hussar

design:
Dorota Koziara
2012

HUSSAR was designed to meet the demands of the chaotic, mobile world of today, focusing on providing comfort to people who crave for intimacy to be able to talk, work or relax in a public space during their busy days when working or travelling.
This is a line of seats which gives you the possibility to apply three backrest heights: 90 cm, 130 cm and 180 cm. The variety of heights makes it possible to comfortably arrange large and medium-size spaces like hotels, offices, airports, to shape the interior's prevailing character by means of furniture, as well as to develop small, intimate areas within the interior, which are invaluable in public spaces. The HUSSAR collection includes: a sofa, an armchair, a pouf and a table.
