

leaf_pod

stand_pod

: product card

Leaf_pod's modularity allows you to arrange your office to suit the needs of both collaborative and individual work. It is also ideal for creating rest areas. The high acoustic parameters of the walls mean that noise penetrates less into the other zones of the office and the range at which conversations can be held is shortened. This allows you to work efficiently, stay highly concentrated and organise meetings in comfort.

collection advantages

focus zone

Open space with a private area for individual work is no longer a dream, but a reality within reach. On the one hand, a cluster of workstations facilitates communication, while on the other, it provides the opportunity to work in focus.

collaboration zone

The key to success in business is a well-coordinated team that can work together. If you want to make progress, you need to concentrate. You can try an area separate from the rest of the office equipped with a roof, table and chairs. The Leaf_Pod collection includes sets ideal for spaces that require constant communication and collaboration.
