

capdell

Capdell was born from the  
tradition of working with  
natural wood, imagining and  
sculpting it.

since  
1967

50

More than 50 years  
committed with the  
design culture, using  
wood as inspiration to  
create comfortable,  
functional and timeless  
designs.

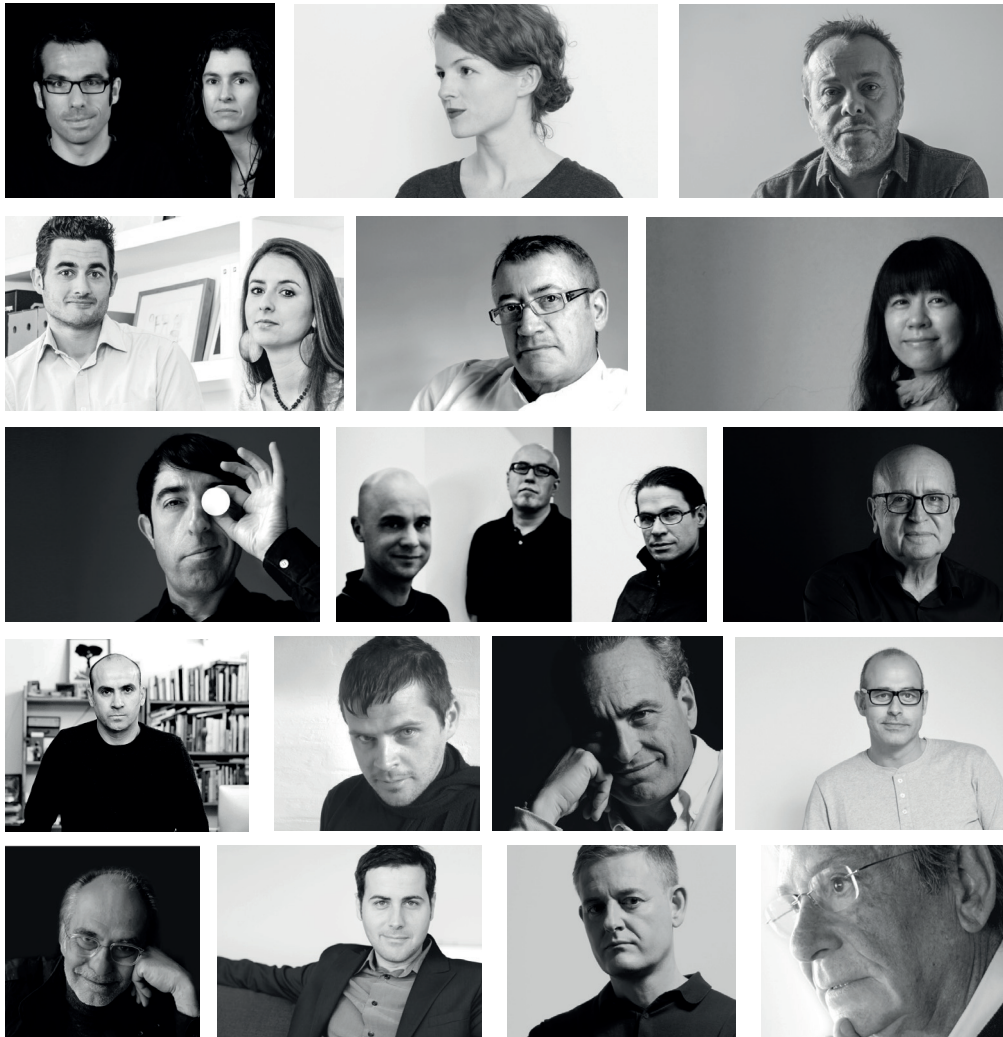

# Design as culture

We have focused on design from  
our very inception more than half  
century ago.

We view design as a culture and  
this enable us to create unique  
pieces that inspire and connect  
people through comfort and  
happiness.

## Working with designers

Every Capdell collection is the result of a collaboration with designers and architects from all around the world, promoting creativity, innovation and functionality.

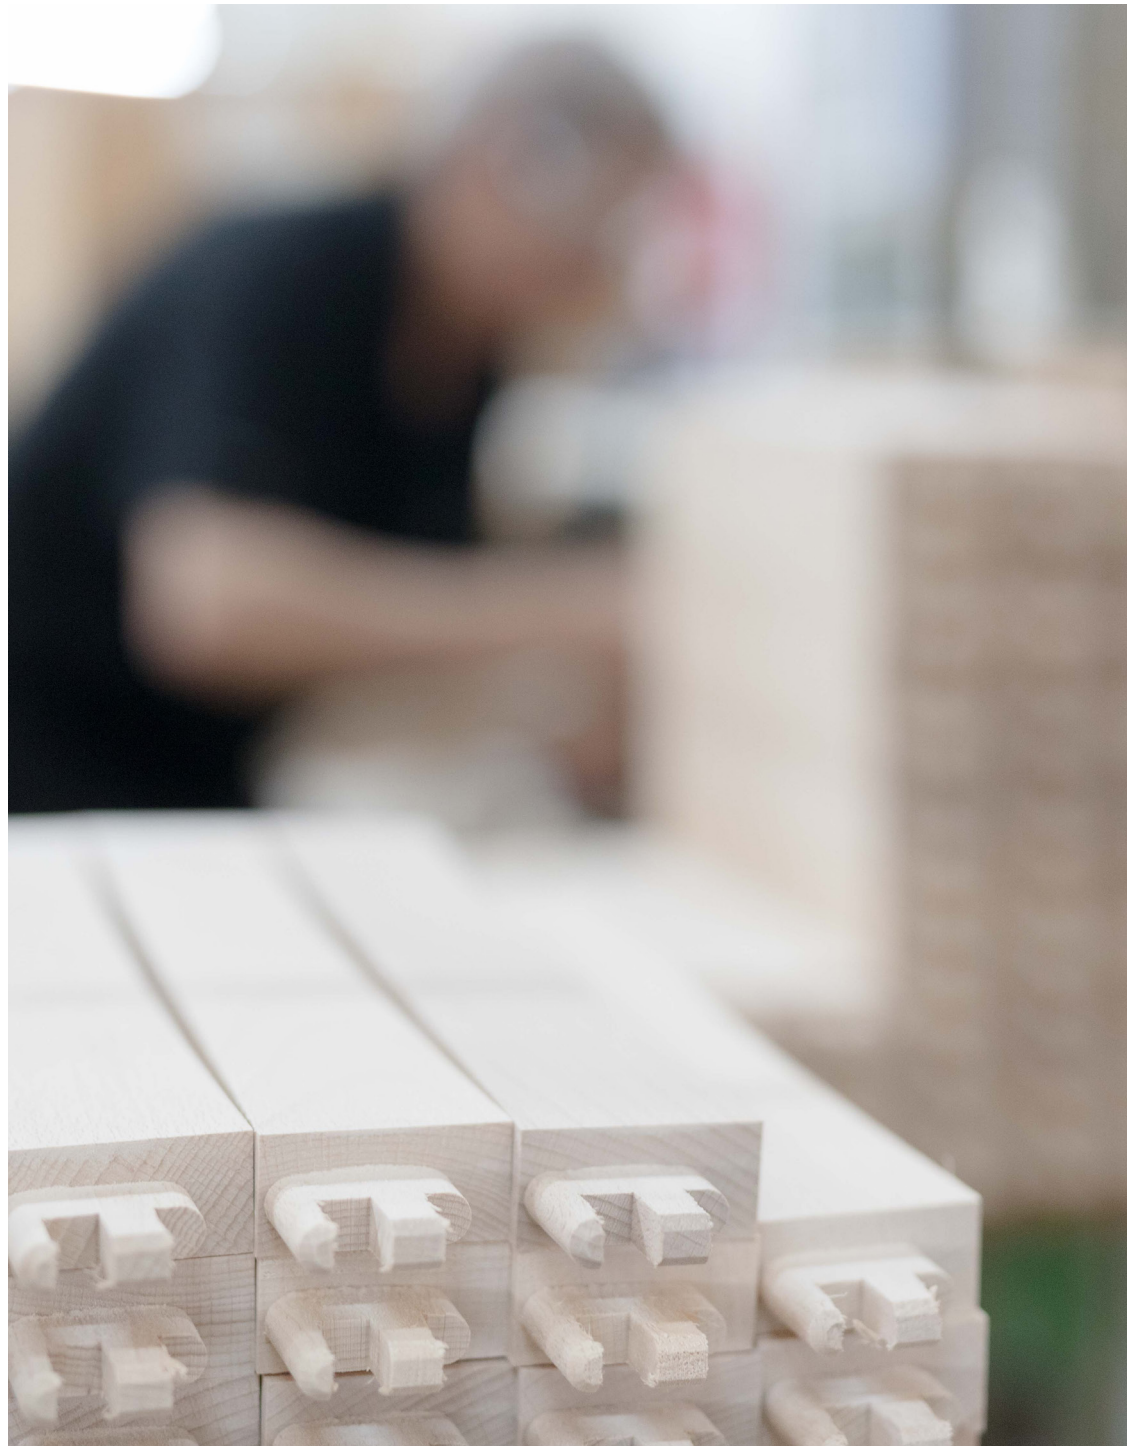

## Awards

# Manufactured in Spain

Capdell was born in Valencia.

Our Spanish identity is  
reflected in every design and  
we feel very proud to locally  
produce all our furniture.

## Committed to sustainability

All the wood we use comes from sustainable forests where a tree is planted for each one that is felled.

We generate energy to feed the production system and to heat the factory from the waste wood we produce.

PEFC Certificate

# Spaces to inspire

Our designs are the result of craftsmanship, quality and customised production giving the final products the capacity to be adapted to a wide range of spaces, from contract to residential.
