RF26650

ELECTRICAL MOUNTING BODY ASSEMBLY

Fig.2

Unscrew and remove the ferrule.

WARNING! When installing and whenever acting on the appliance, ensure that the power supply has been switched off.
For the installation of the spare-part, it is necessary to consult a qualified electrician.

RF26650

ELECTRICAL MOUNTING BODY ASSEMBLY

Fig.3

Disconnect the body lamp by the ring.

Fig.4

Unfasten the screws and remove the cover of the lower joint.

WARNING! When installing and whenever acting on the appliance, ensure that the power supply has been switched off.
For the installation of the spare-part, it is necessary to consult a qualified electrician.

RF26650

ELECTRICAL MOUNTING BODY ASSEMBLY

Fig.5

Unfasten the screws and remove the cover of the higher joint.

Pull the old cable out.

WARNING! When installing and whenever acting on the appliance, ensure that the power supply has been switched off.
For the installation of the spare-part, it is necessary to consult a qualified electrician.

RF26650

ELECTRICAL MOUNTING BODY ASSEMBLY

Fig.6

Connect the new body lamp to the ring respecting the correct installation direction.

WARNING! When installing and whenever acting on the appliance, ensure that the power supply has been switched off.
For the installation of the spare-part, it is necessary to consult a qualified electrician.

RF26650

ELECTRICAL MOUNTING BODY ASSEMBLY

Fig.7

Insert the new body lamp. Fasten the screws, connect the ferrule and fix the cover of the higher joint.

RF26650

ELECTRICAL MOUNTING BODY ASSEMBLY

Position the new body lamp. Fasten the screws, connect the ferrule and fix the cover of the lower joint.

RF26650

ELECTRICAL MOUNTING BODY ASSEMBLY

Fig.10

ADJUSTING THE CABLE TENSION: Pull the cable out of hole (C) then thread it through the pin (D) so as to increase its tension, then tighten the ferrule. If necessary, do the same at the bottom, moving the cable from hole (H) to hole (I); then tighten the ferrule.

Connect the plug of the new body lamp to the dimmer unit by rotating it 90° clockwise.(Fig.1 page 9)

WARNING! When installing and whenever acting on the appliance, ensure that the power supply has been switched off.
For the installation of the spare-part, it is necessary to consult a qualified electrician.

RF26644

ELECTRICAL MOUNTING ASSEMBLY WITH DIMMER

Fig.1

Disconnect the plug of the old electrical mounting with dimmer assembly from the driver and disconnect the dimmer from the electrical mounting body assembly by rotating it 90° clockwise.

Fig.2

Connect the plug of the new electrical mounting with dimmer assembly from the driver and connect the dimmer to the electrical mounting body assembly by rotating it 90° clockwise.

RF26644

ELECTRICAL MOUNTING ASSEMBLY WITH DIMMER

Fig.3

To switch the device on/off push the button (Q); light sequence: MAXIMUM / MINIMUM (50%) / OFF. When the appliance is switched on, prolonged contact of the button causes a progressive decrease of light intensity up to 10% and viceversa. Upon reaching the desired intensity, stop contact with the button. NOTE: Due to the dimmer memory, when the appliance is switched on again (from the wall switch or otherwise), it goes to the same level of light intensity that it was set to before being switched off. The dimmer function can only be activated through the sensor (Q). After a blackout with the appliance switched off, it will stay off when the power is restored.
