

# Alba Chair

Softly Versatile, Balanced Proportions

# Alba Chair Collection

The Alba Chair Collection epitomizes elegance with its fully upholstered design, perfectly suited for diverse environments such as offices, meeting rooms, conferences, and contract areas. Its originality stems from meticulously balanced proportions and precise construction techniques. The chair features a soft style with a dynamic profile and an elegant shell design that exudes a distinct personality.

Experience superior comfort with seat and backrest upholstered in molded polyurethane foam, seamlessly integrated over a sturdy metal shell structure. The armrests are thoughtfully incorporated into the seat shell with a soft polyurethane finish, enhancing both aesthetics and functionality and also increasing durability, providing a pleasant and long-lasting user experience. A characteristic double seam outlines the shell's perimeter, adding a refined touch. Choose from a five-star base with optional swivel and tilt mechanisms, lockable in an upright position for added versatility.

The Alba Collection offers a wide range of contemporary chairs available in three backrest heights and four base types. With an extensive selection of fabric and leather finishes, customization options are virtually limitless. Continuous stitching along the chair's perimeter highlights its sophisticated design, ensuring each piece stands out in any setting.

Every aspect of the Alba Chair is thoughtfully designed, achieving an ideal and balanced mix of form and function. This meticulous attention to detail makes the Alba Chair the ultimate expression of versatility, seamlessly blending style and comfort in any professional environment. Whether it's for an office, meeting room, or conference area, the Alba Chair's elegant design and superior functionality ensure a sophisticated and comfortable seating solution tailored to your specific needs.

The excellent quality of the seat is guaranteed by a frame composed of a series of steel tubulars that form a rigid structure able to maintain its shape even under conditions of considerable stress. The cold-foamed polyurethane padding with variable thicknesses provide uniform comfort over the entire width of the seat, supporting and distributing the weight of the body.

## Alba 4/5 Star Base | Technical Specification

**Structure:** The excellent quality of the seat is guaranteed by a frame composed of a series of steel tubulars that form a rigid structure able to maintain its shape even under conditions of considerable stress. The cold-foamed polyurethane padding with variable thicknesses provides uniform comfort over the entire width of the seat, supporting and distributing the weight of the body. Available in three backrest heights.

**Seat and backrest:** The fabric or leather upholstery covers the entire structure. A characteristic continuous stitching emphasizes the perimeter of the chair and is available, on request, with a contrasting color for a personalization of the body.

**Armrests:** Closed shape, they are integrated into the seat structure and are padded with polyurethane foam. The support part of the armrest is made of soft integral polyurethane which makes the finish of the armchair pleasantly comfortable and increases the durability of the product.

**Swivel mechanism:** Multidirectional swivel movement.

**Height adjustment:** Seat height can be adjusted a maximum of 12 cm with a lever. The gaslift complies to EN16955:2017.

**Tilt mechanism:** An intuitive and effective tilt mechanism that instantly follows the user's movements. The particularly forward rotation point reduces pressure on the lower limbs while the chair rocks. The movement of the seat allows up to 16° of oscillation. The side knob allows to adapt the resistance of the tilting mechanism to the weight and sitting style of the user. Lever controls integrate the seat height adjustment, allow to lock/unlock the tilting mechanism in 5 positions and activate the backrest safety release.

**Base:** Four or five star base made of die-cast aluminum, with a polished, chromed or painted finish depending on the structure. Available with castors or plastic glides.

**Castors:** In black plastic with soft running surface for use on any type of flooring and a load depending safety brake complies to EN 12529:2001. Diam. 60 mm.

**Glides:** In black nylon base and soft-plastic glide, diam. 37 mm, with central felt element on request.

## Materials Certifications

We use fabrics that guarantee high performance in terms of comfort, strength and sustainability. Attention to the health and safety of people and the environment are verified through globally-recognised product certification. Most of the upholstery we use for our seating collections is made from recycled materials which can also be reused at the end of their service life.

## Sustainability

Our design and production philosophy is based on the pursuit of simplicity in order to create sustainable and durable collections. Our products have an unmistakable design which however is subjected to the carefull evaluation of any possible aspects to improve sustainability, durability and recyclability in accordance with the highest international standards. We believe that our responsible approach may effectively reduce environmental impact of our products throughout the entire lifecycle of the various components. We do not use chemicals hazardous or dangerous to the environment, and the materials we use are tested and evaluated for potentially harmful effects on human health and the environment. Where possible, we reduce packaging materials to a minimum, which also optimises transport volume.

### Alba Chair 5 Star Base

Materials		%
Metal		53
Polyurethane		15
Aluminum		14
Plastic		12
Miscellaneous		6
<b>Total</b>		<b>17.1 kg</b>

The materials we select meet high quality standards, guaranteeing durable and eco-friendly products.

At ICF, we use:

- Ecological and/or post-consumer recycled materials;
- Products free from formaldehyde and toxic substances;
- Finishes free from hexavalent chromium.

Each component of the seat can be disassembled for repair, reuse and recycling.

		%
Recycling		94
Not recycling		6

Alba Chair is a chair weighing approximately 17.1 kg and approximately 94% recyclable when completely and correctly separated.

Alba Chair is conceived in accordance with the guidelines of eco-design, a technical methodology applied during design of a product in order to reduce that product's carbon footprint and environmental impact.

*Note:*

*Material and Recycling content percentages may vary depending on the specific model evaluated and consequently of the structural materials and finishes of the considered model.*

*The above sustainability contents refer to model ALB.150.*
