

# Finn Wood

Wood and Natural Elegance

## Finn Wood | Technical Specification

Finn Wood is a seat with rigorous and elegant lines that reinterprets the classic wooden chair in a modern way. It consists of a light and thin ash structure with a plastic frame. It is suitable for all professional environments such as office, meeting and conference areas. It is suitable for public spaces such as hotels and restaurants.

Finn Wood has a solid ash structure, reinforced by a die-cast aluminum frame, partially visible and painted in the colors of the plastic shell. The polypropylene shell is available in various colors.

**Structure and base:** Four-legged structure in solid ash wood with natural or painted finish in combination with the frames of the seat and backrest. The wooden structure is reinforced by a die-cast aluminum frame positioned under the seat, partially visible, and painted in the colors of the plastic shells.

**Seat and backrest:** Made of thermoplastic nylon resin, available on request in fire-retardant version. The surface finish has a characteristic slightly embossed texture. The seat and backrest are easily replaceable on site. Available in different standard colors also in combination with the painting of the steel structure.

**Glides:** In black nylon base and soft-plastic glide, diam. 37 mm.

## Sustainability

Our design and production philosophy is based on the pursuit of simplicity in order to create sustainable and durable collections. Our products have an unmistakable design which however is subjected to the carefull evaluation of any possible aspects to improve sustainability, durability and recyclability in accordance with the highest international standards. We believe that our responsible approach may effectively reduce environmental impact of our products throughout the entire lifecycle of the various components. We do not use chemicals hazardous or dangerous to the environment, and the materials we use are tested and evaluated for potentially harmful effects on human health and the environment. Where possible, we reduce packaging materials to a minimum, which also optimises transport volume.

### Finn Wood

Materials		%
Aluminum		34
Plastic		32
Wood		28
Metal		6
Total		5.4 kg

The materials we select meet high quality standards, guaranteeing durable and eco-friendly products.

At ICF, we use:

- Ecological and/or post-consumer recycled materials;
- Products free from formaldehyde and toxic substances;
- Finishes free from hexavalent chromium.

Each component of the seat can be disassembled for repair, reuse and recycling.

		%
Recycling		100
Not recycling		0

Finn Wood is a chair weighing approximately 5.4 kg and approximately 100% recyclable when completely and correctly separated.

Finn Wood is conceived in accordance with the guidelines of eco-design, a technical methodology applied during design of a product in order to reduce that product's carbon footprint and environmental impact.

Note:

Material and Recycling content percentages may vary depending on the specific model evaluated and consequently of the structural materials and finishes of the considered model.

The above sustainability contents refer to model FWW.800.
