

Patoz Chair

Just the Essence

Patoz Chair

Patoz stands out as a multipurpose chair that combines minimalism with functionality, perfectly suited for environments where clean lines and refined details are valued.

The Patoz Chair, designed by the renewed Italian architect Francesco Soro, epitomizes simplicity with its clear, linear aesthetic. The chair's essence lies in its minimalist design, which highlights the sleek steel rod frame, and the refined saddle hide upholstery. The structure, with its 11 mm diameter steel rods, is available in two finishes: chrome and black epoxy paint. This understated elegance emphasizes Patoz's visual impact, making it a versatile piece suitable for various settings.

The ingenious backrest has a slight pivoting feature that allows for a dynamic seating experience, offering both support and flexibility as you adjust your posture.

The steel rod frame of Patoz is both functional and stylish, offered in either a polished chrome or a sleek black epoxy painted finish. This robust frame supports the chair's simple yet striking design. The seat and backrest are crafted from high-quality saddle leather, distinguished by its exposed stitching. Available in five colors, the leather adds a touch of sophistication while maintaining durability. The backrest is designed to pivot slightly, providing a firm yet flexible support that enhances comfort.

Structure: Steel rod structure chromed or painted in black.

Seat and backrest: In saddle leather with exposed stitching.

Backrest: Pivoting.

Sustainability

Our design and production philosophy is based on the pursuit of simplicity in order to create sustainable and durable collections. Our products have an unmistakeable design which however is subjected to the carefull evaluation of any possible aspects to improve sustainability, durability and recyclability in accordance with the highest international standards. We believe that our responsible approach may effectively reduce environmental impact of our products throughout the entire lifecycle of the various components. We do not use chemicals hazardous or dangerous to the environment, and the materials we use are tested and evaluated for potentially harmful effects on human health and the environment. Where possible, we reduce packaging materials to a minimum, which also optimises transport volume.

Patoz Chair

Materials		%
Metal		85
Plastic		8
Miscellaneous		7
Total		8.2 kg

The materials we select meet high quality standards, guaranteeing durable and eco-friendly products.

At ICF, we use:

- Ecological and/or post-consumer recycled materials;
- Products free from formaldehyde and toxic substances;
- Finishes free from hexavalent chromium.

Each component of the seat can be disassembled for repair, reuse and recycling.

		%
Recycling		93
Not recycling		7

Patoz Chair is a chair weighing approximately 8.2 kg and approximately 93% recyclable when completely and correctly separated.

Patoz Chair is conceived in accordance with the guidelines of eco-design, a technical methodology applied during design of a product in order to reduce that product's carbon footprint and environmental impact.

Note:

Material and Recycling content percentages may vary depending on the specific model evaluated and consequently of the structural materials and finishes of the considered model.

The above sustainability contents refer to model PT.
