Charlotte table

Charlotte table lamp with direct light. The structure and the lampshade is made in metal and the lampshade can be moved as desired.

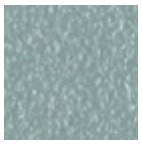

On the power cable there is the on / off switch. The cable has a length of 1.5 m and is covered with black silk.

Colors and Materials

Structure

Black steel

Papaya orange steel

Light blue metal

White steel

Ocean blue steel

Bronze metal

Sand steel

Fango steel

Golden yellow metal

Pastel yellow steel

Grafite metal

Ash grey metal

Light grey steel

Brown steel

Ocher steel

Facepowder pink metal

Red steel

Bulgaro red metal

Cherry red metal

Pine green steel

Sage green metal

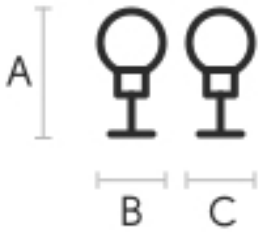

Dark green metal

White pearl metal

Blue turquoise metal

Blue sapphire metal

Dimensions

A (cm)	B (cm)	C (cm)
(inch)	(inch)	(inch)
42	22	12
16.5	8.7	4.7

Volumetric Details

Weight 2 Kg
Volume 0.02 mc
Package 1

Certifications

CE

Classe II

Materials Certifications

Dark green metal

The technologies used in the previous phase of powder coating play a fundamental role in the final result of the processing. They are in fact essential to increase adherence paint on the metal surface and then guarantee its duration over time. The metal frames, following a total cleaning of the surface, pass through chemical conversion processes, creating a compact base that allows for better adhesion of the subsequent treatment. In the last phase the object subjected to the powder coating process is placed in a polymerization oven, going to form an adherent and extremely tight layer durable. This particular paint job is ideal for outdoor use.

To clean the surface, use a damp microfiber cloth with neutral soap or specific metal cleaning products. Avoid hitting or rubbing the surface with sharp objects. Do not use scourers or other abrasive materials, since they would inevitably scratch the surface. Do not leave rusty iron objects on the surface for too long.

These surface treatments are not suitable for outdoor use, but they guarantee excellent resistance to frequent use, dirt and dust.
