

Noti.Ekori

Comfort and sustainability in one chair!

Ekori is Noti's greenest chair, designed to reuse as much material as possible in order to gradually minimise the environmental footprint of the manufacturing process.

Driven by the concept of sustainability, the structural design of Ekori chairs and bar stools was a unique technological challenge. The backrest is made from 100% recycled polypropylene, characteristic for high strength and durability. In its most sustainable options, Ekori chairs can be quickly and easily disassembled into separate material groups (plastics, metals, fabrics) and recycled. The seat and the upholstered backrest are made from string and fabric only, with no glue or staples for easy end-of-life material recovery.

We made sure that Ekori is a place where unique comfort meets sustainability. 100% recycled polypropylene is so flexible that it perfectly adapts to the user's body, allowing you to sit comfortably for hours. By combining its properties with our experience in crafting exceptionally comfortable sofas, we created a small, yet extremely comfortable and environmentally responsible chair, making it a perfect choice for a wide range of interiors.
