# “WE CONSIDER PLASTIC A PRECIOUS MATERIAL AND IT SHOULD BE USED CAREFULLY ONLY WHEN IT MAKES SENSE”

## OUR PRODUCTS ARE REUSABLE UNLIMITED TIMES 100% RECYCLABLE

Most of our products are mainly made of 100% mono material: linear low density polyethylene LLDPE resin by rotational molding process. Polyethylene is a 100% recyclable polymer. Consequently, SERRALUNGA products are 100% recyclable and have a long life (over 10 years).

SERRALUNGA uses mainly LLDPE, 100% recyclable and some of our colours are made with recycled materials. As a result our products are reusable unlimited times. The material and its production process makes the products very resistant to extreme temperatures (-35 °C/+ 80°C; -31°F/+176°F), shocks, UV rays and saline climates.

## THE CYCLE OF TRANSFORMATION A VIRTUOUS CIRCULAR ECONOMY

At the end of their life, our objects can be transformed into plastic powder to give new life to other objects, for “a virtuous circular economy”.

The rotational molding process allows to operate at low temperature and in absence of pressure. Then, a non-forced air cooling completes the production process. Consequently the cycle of transformation is very long, if compared to other moulding technologies, it takes approx. 30 minutes to produce one piece. In this way, the material doesn't undergo thermal shocks due to high temperatures, or physical shocks due to strong cooling and short production cycles. For these reasons a simple polymer such as LLDPE has physical characteristics of high strength, elasticity and durability.

## *CONSCIOUS PRODUCTION* **A CONTINUOUS PROCESS**

SERRALUNGA uses only raw material transformed in Italy and certificated as per EU legislations. This has a positive impact also on the transport: it allows us to produce lower CO2 emissions.

We recycle our discarded products internally. We have started to use more and more second life LLDPE raw material containing 30% to 70% of regenerated material, without reducing or penalizing the quality and resistance of our objects.

The entire production process is made in SERRALUNGA factory located in Biella (North of Italy). Our production plant is equipped with PHOTOVOLTAIC PANELS that reduce energy consumption to the minimum respecting the environmental Ethics.

**SUSTAINABLE** - No polluting solvents are employed during the production process

**ECOLOGICAL** - They are obtained with inert and recyclable raw materials

**LONG LASTING** - Resistant, Long lasting, Excellent value for money

**WEATHER RESISTANT** - Products made of polyethylene (LLDPE) by roto molding bear sudden thermal excursions from -35 °C to +80 °C / -31°F/+176°F. Robust and shock resistant.

**LIGHT WEIGHT** - Easy to handle

**MINIMAL MAINTENANCE** - Can be cleaned quickly and easily

## FISSAGGIO A TERRA GROUND FIXING

I prodotti possono essere fissati a terra tramite piastre in acciaio inox AISI 316.

I tasselli per l'ancoraggio non sono inclusi nel kit, ma devono essere acquistati in base al tipo di pavimentazione su cui si desidera fissare il prodotto. Si consigliano 3 piastre per i vasi tondi e 2/4 piastre per i vasi quadrati e rettangolari.

Products can be fixed to the ground with AISI 316 stainless steel plates. Rawplugs are not included in this kit, they must be bought according to the ground where you want to fix the product. We suggest 3 plates for round pots and 2/4 plates for square and rectangular pots.

The pot is provided with a hook in stainless steel AISI 316. It's resistant to weather, chlorine, corrosion and suitable in saline environment. Nogs not included. Buy the nogs suited for the type of wall on which you are going to fix the pot (bricks, concrete, plasterboard, etc.).

# ISTRUZIONI PER INVASATURA

## POTTING INSTRUCTIONS

### Riempimento vaso

Riempire il vaso con 1/3 in altezza di argilla espansa, posizionare uno strato di tessuto drenante e completare il riempimento con terriccio alleggerito per giardini pensili fino a qualche cm dal bordo del contenitore interno. Attenzione, l'uso esclusivo di terra è sconsigliato perchè si compatta, non drena ed appesantisce oltre il consentito la struttura con rischio di danneggiare il vaso.. L'argilla espansa svolge la funzione di riserva d'acqua, trattenendo l'umidità in eccesso e rilasciandola nel caso essa sia insufficiente.

### Potting instructions

Fill the pot with 1/3 in height of expanded clay, put a draining cloth and complete filling with green roof lightweight soil, leaving 5 cm from the pot rim. Warning, the exclusive use of ordinary soil is not recommended, as it does not drain well and weigh down the structure beyond the permitted with risk of damaging the pot. Expanded clay has the function of water reservoir, holding excess wet and releasing it in case it is insufficient.

### Portavaso

Infine i nostri vasi possono essere utilizzati come cachepot (portavaso). Sugeriamo l'utilizzo di un semplice vaso iniezione (plastica) con relativo sottovaso (opzionale).

Nel caso in cui il vaso sia provvisto di kit per il drenaggio dell'acqua, non rimuovere il tappino in PVC.

### Cachepot

Finally, our pots can be used like cachepot. We suggest the use of an injection pot with relative saucer (optional).

In case that the drainage kit has already been mounted, don't remove the PVC stopper.

### Interno

Procedere con l'invasatura senza forare il prodotto e, nel caso sia presente il kit di drenaggio dell'acqua, senza rimuovere il tappino in PVC dall'interno dell'alloggiamento

### Indoor

Proceed with the potting without drilling the product and, if there is a water drainage kit, without removing the PVC stopper

### Esterno

I nostri vasi possono anche essere utilizzati come dei vasi di terracotta, praticando con un comune trapano dei fori sul fondo del vaso (foratura Ø 6 mm circa). Per i vasi a doppia parete, nel caso sia presente il kit di drenaggio, va rimosso il tappo prima dell'invasatura, mentre se non sono muniti di kit di drenaggio, va forata sia la vasca interna che il fondo.

### Outdoor

Our pots can also be used like terracotta pots, making holes with a common drill on the bottom of the pot (hole Ø 6 mm). If double-wall pots, have drainage kit, the cap must be removed before planting.

In case double-wall pots are not equipped with drainage kit, both the inner tank and the bottom must be drilled.

MOLESKIN FINISHING

Finitura artigianale sviluppata nei laboratori Serralunga.

Moleskin è una lavorazione artigianale che viene dalla storia di Serralunga e nello specifico dall'esperienza nella lavorazione del cuoio.

Con lo spirito di ricerca ed innovazione che da sempre caratterizza l'evoluzione dell'Azienda presentiamo con orgoglio alcuni nostri prodotti con un aspetto inedito alla vista ed inaspettato al tatto.

Una lavorazione che richiama i pregiati tessuti in fustagno, tessuti robusti, caldi e confortevoli, superfici da toccare e pettinare come una pelle di daino.

Con Moleskin la resistenza e la qualità dell'arredo outdoor di Serralunga si veste di una raffinata e nel contempo tradizionale eleganza.

Handcrafted finish developed in Serralunga laboratories.

Moleskin is a craftsmanship that comes from the history of Serralunga and specifically from the experience in leather processing.

With the spirit of research and innovation that has always characterized the evolution of the company, we proudly present some of our products with an unprecedented appearance at the sight and unexpected to the touch.

A process that recalls the precious moleskin fabrics, sturdy, warm and comfortable fabrics, surfaces to touch and comb like a deerskin.

With Moleskin, the strength and quality of Serralunga's outdoor furniture get dressed in a refined and at the same time traditional elegance.
