Che cosa significa la lettera A nel nome del prodotto? Guardando il tavolo di fianco, si riconosce una forma che ricorda quella di una lettera - una grande A.

Questa A è nata per caso durante il primo studio che Maly ha fatto per questo grande tavolo che presenta due lunghe staffe in legno massello inclinate l'una verso l'altra. Come si potevano stabilizzare? La soluzione è stata quella di inserire due rinforzi orizzontali: la prima traversa è stata posizionata nella parte superiore delle due staffe, la seconda più bassa. In questo modo, una volta assemblato il piano, è stata creata una struttura molto stabile. La base in legno era diventata così bella che doveva assolutamente essere messa in evidenza: un piano in vetro è stata la soluzione ideale.

What does the A in the name mean? If you look at the table from the side, you can see a shape reminiscent of a letter - a large A.

This A was rather accidental in Maly's first study on this large dining table, which has two long boards in solid wood tilted towards each other.

How should they be stabilized? The solution was found using two horizontal reinforcements: the first cross beam in the upper part of the two wooden boards and the second in a lower position. In this way, together with the top, was created a very stable form.

This wooden structure has become so beautiful that it had to be left visible. A glass top has been the perfect solution!
