

# Essence

Elegance, Innovation,  
Creativity, Flexibility  
and Value are the keywords  
that inspire our work.  
We commit to these  
principles to create quality  
products that are truly  
unique, beautiful  
and made to last

torre  
1961

Established in 1961,  
Torre bases its success  
on constant evolution,  
setting every day new  
benchmarks for its collection,  
with great focus  
on materials and details.

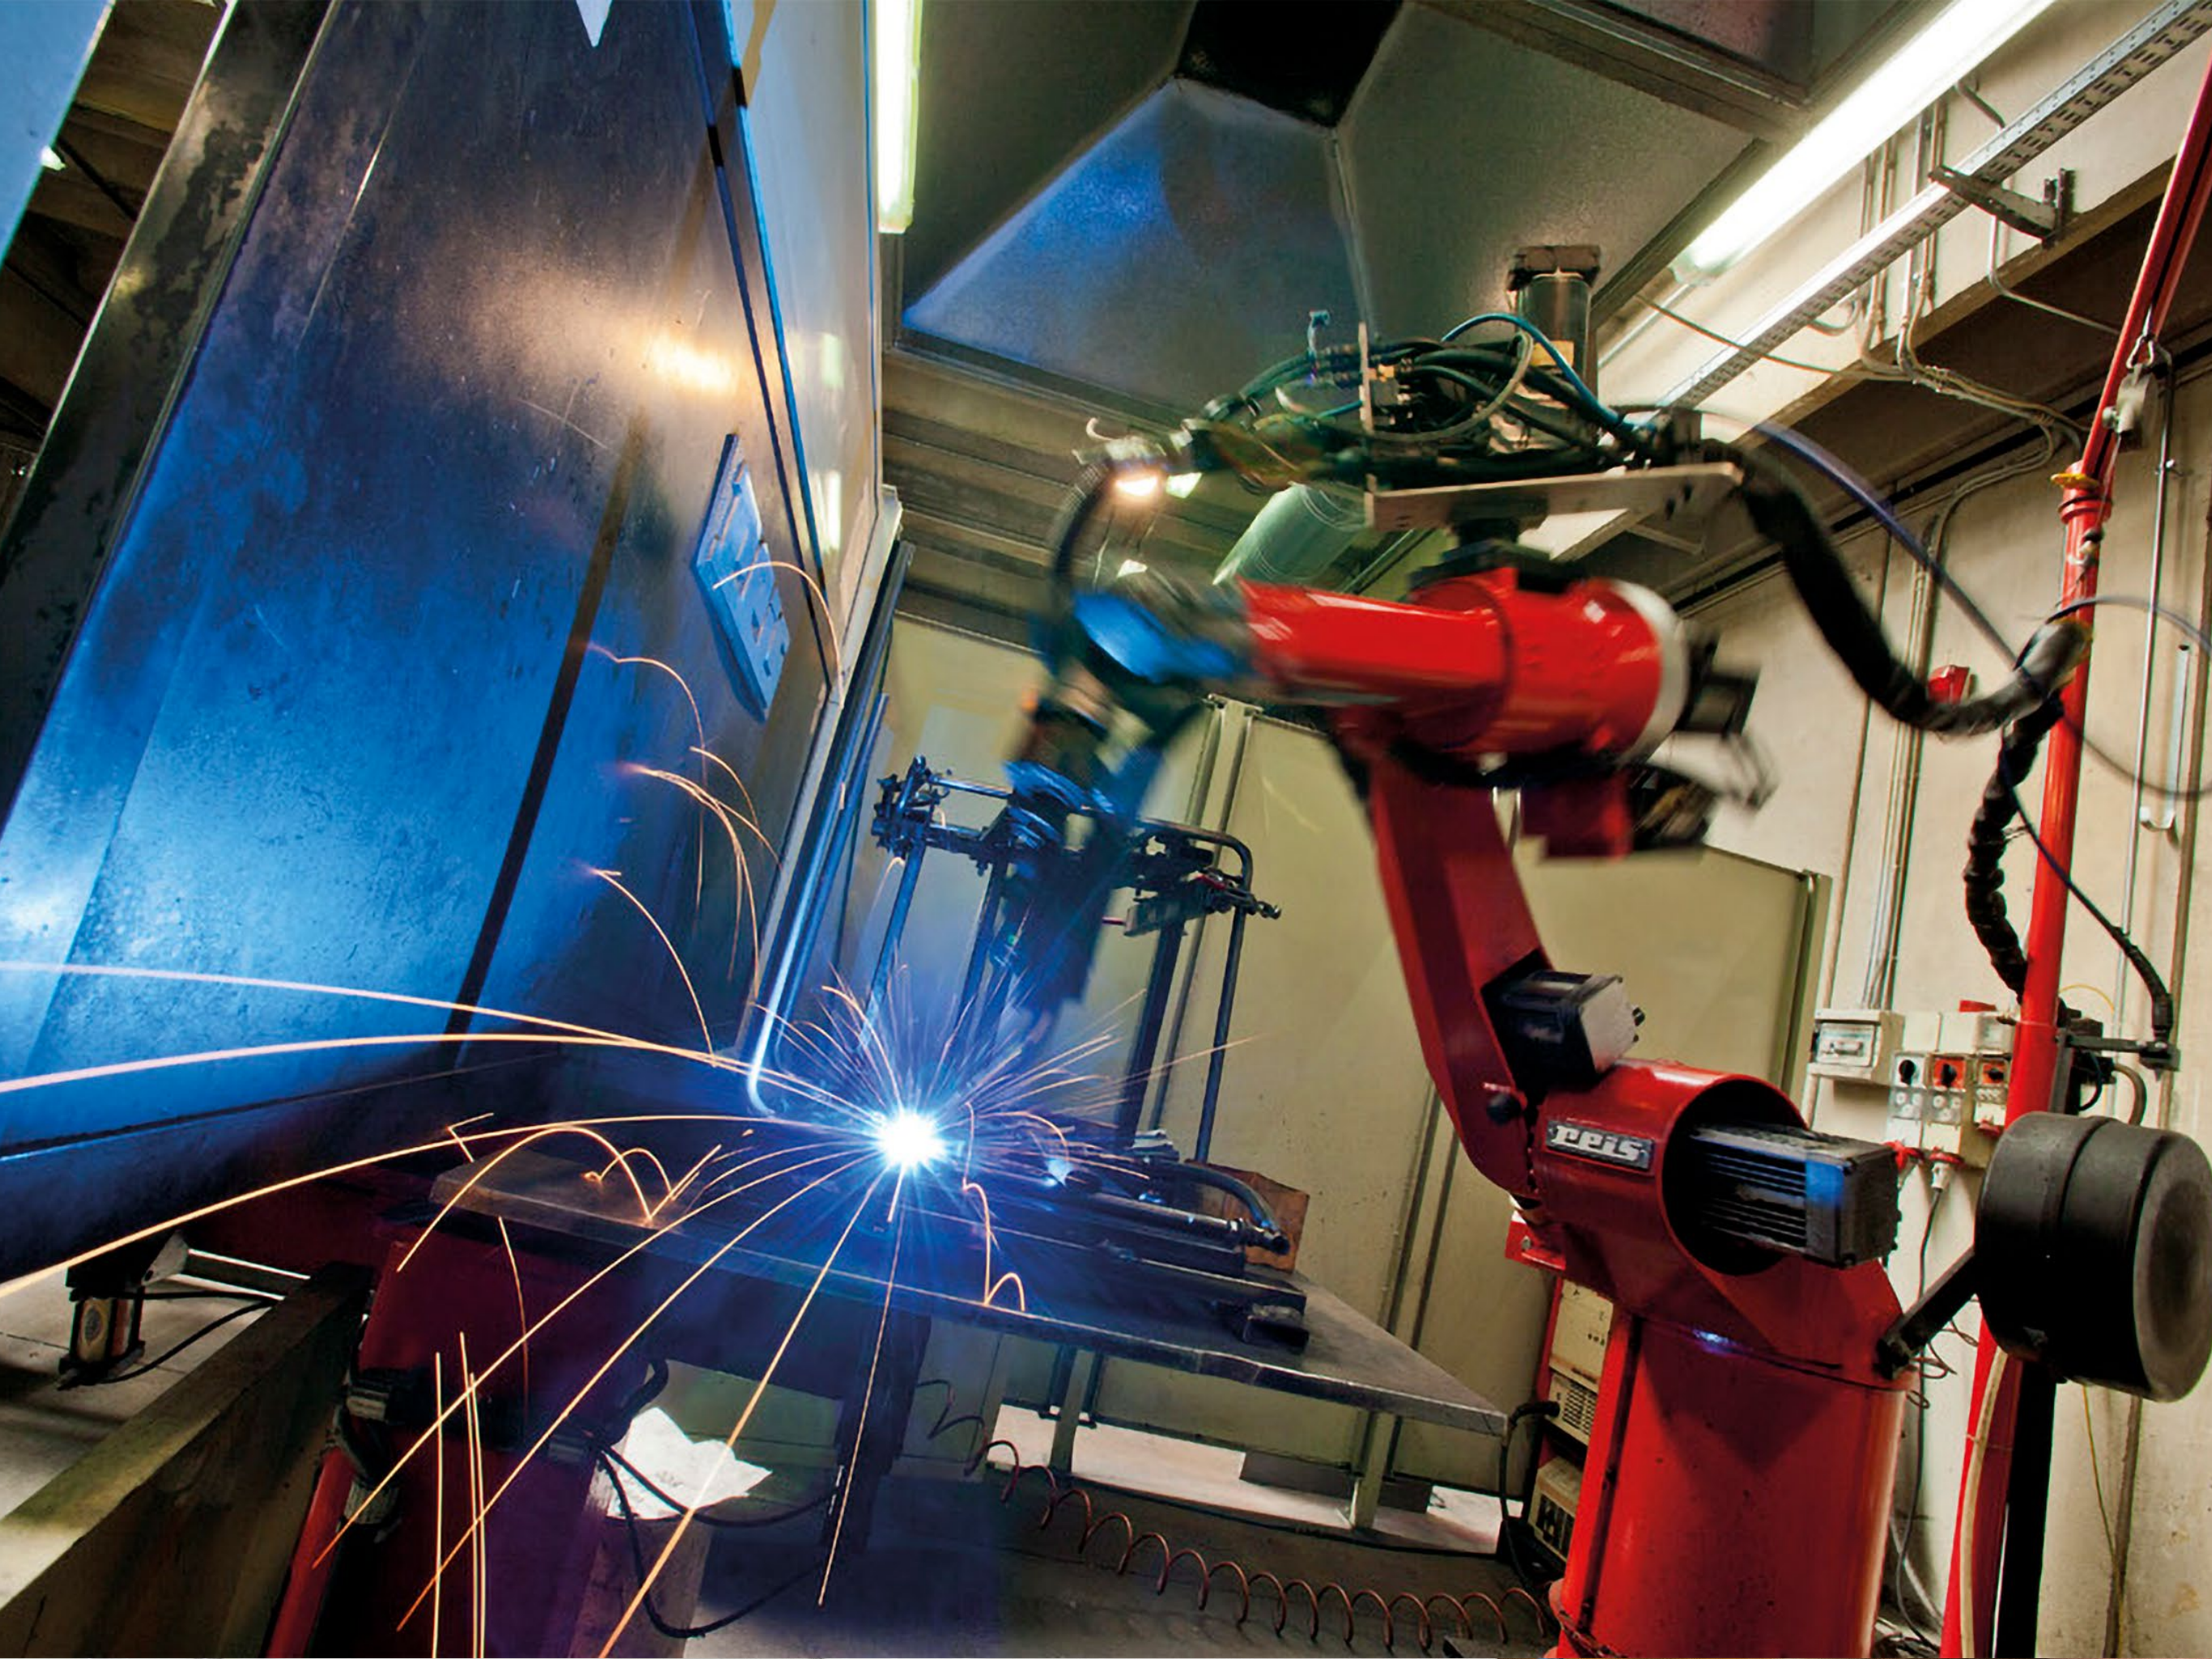

Specialized in seating  
systems for Hospitality,  
Health Care, Marine and  
Office, the company supports  
customer's needs thanks to  
the in-house production,  
that allows the organization  
to be flexible and keep  
full control over the  
manufacturing process

torre

## Metalworking

Our company takes pride in a long tradition of metal forging. Bending the metal to the shape required to transform it into a chair is the core of our heritage of furniture production.

The metal works plant is equipped with cutting edge machinery and run by a thoroughly experienced staff who can produce a wide variety of custom made products.

## Upholstery

The production line is the heart of our factory. Our chairs and tables are carefully assembled by expert hands.

This is where the components are assembled to make a piece of furniture into a unique, custom made product especially designed for our clients.

We combine modern Italian design with the most accurate traditional craftsmanship.

## Collection

The collection is a result of continuous research, investments and improvements in technology.

Thanks to the multi-base program each chair can be tailored to suit every project and space.

## Extreme Comfort

Selected foam densities varying on seat and on inner and outer back of the shell, combines with harmonious ergonomic design.

## Top materials

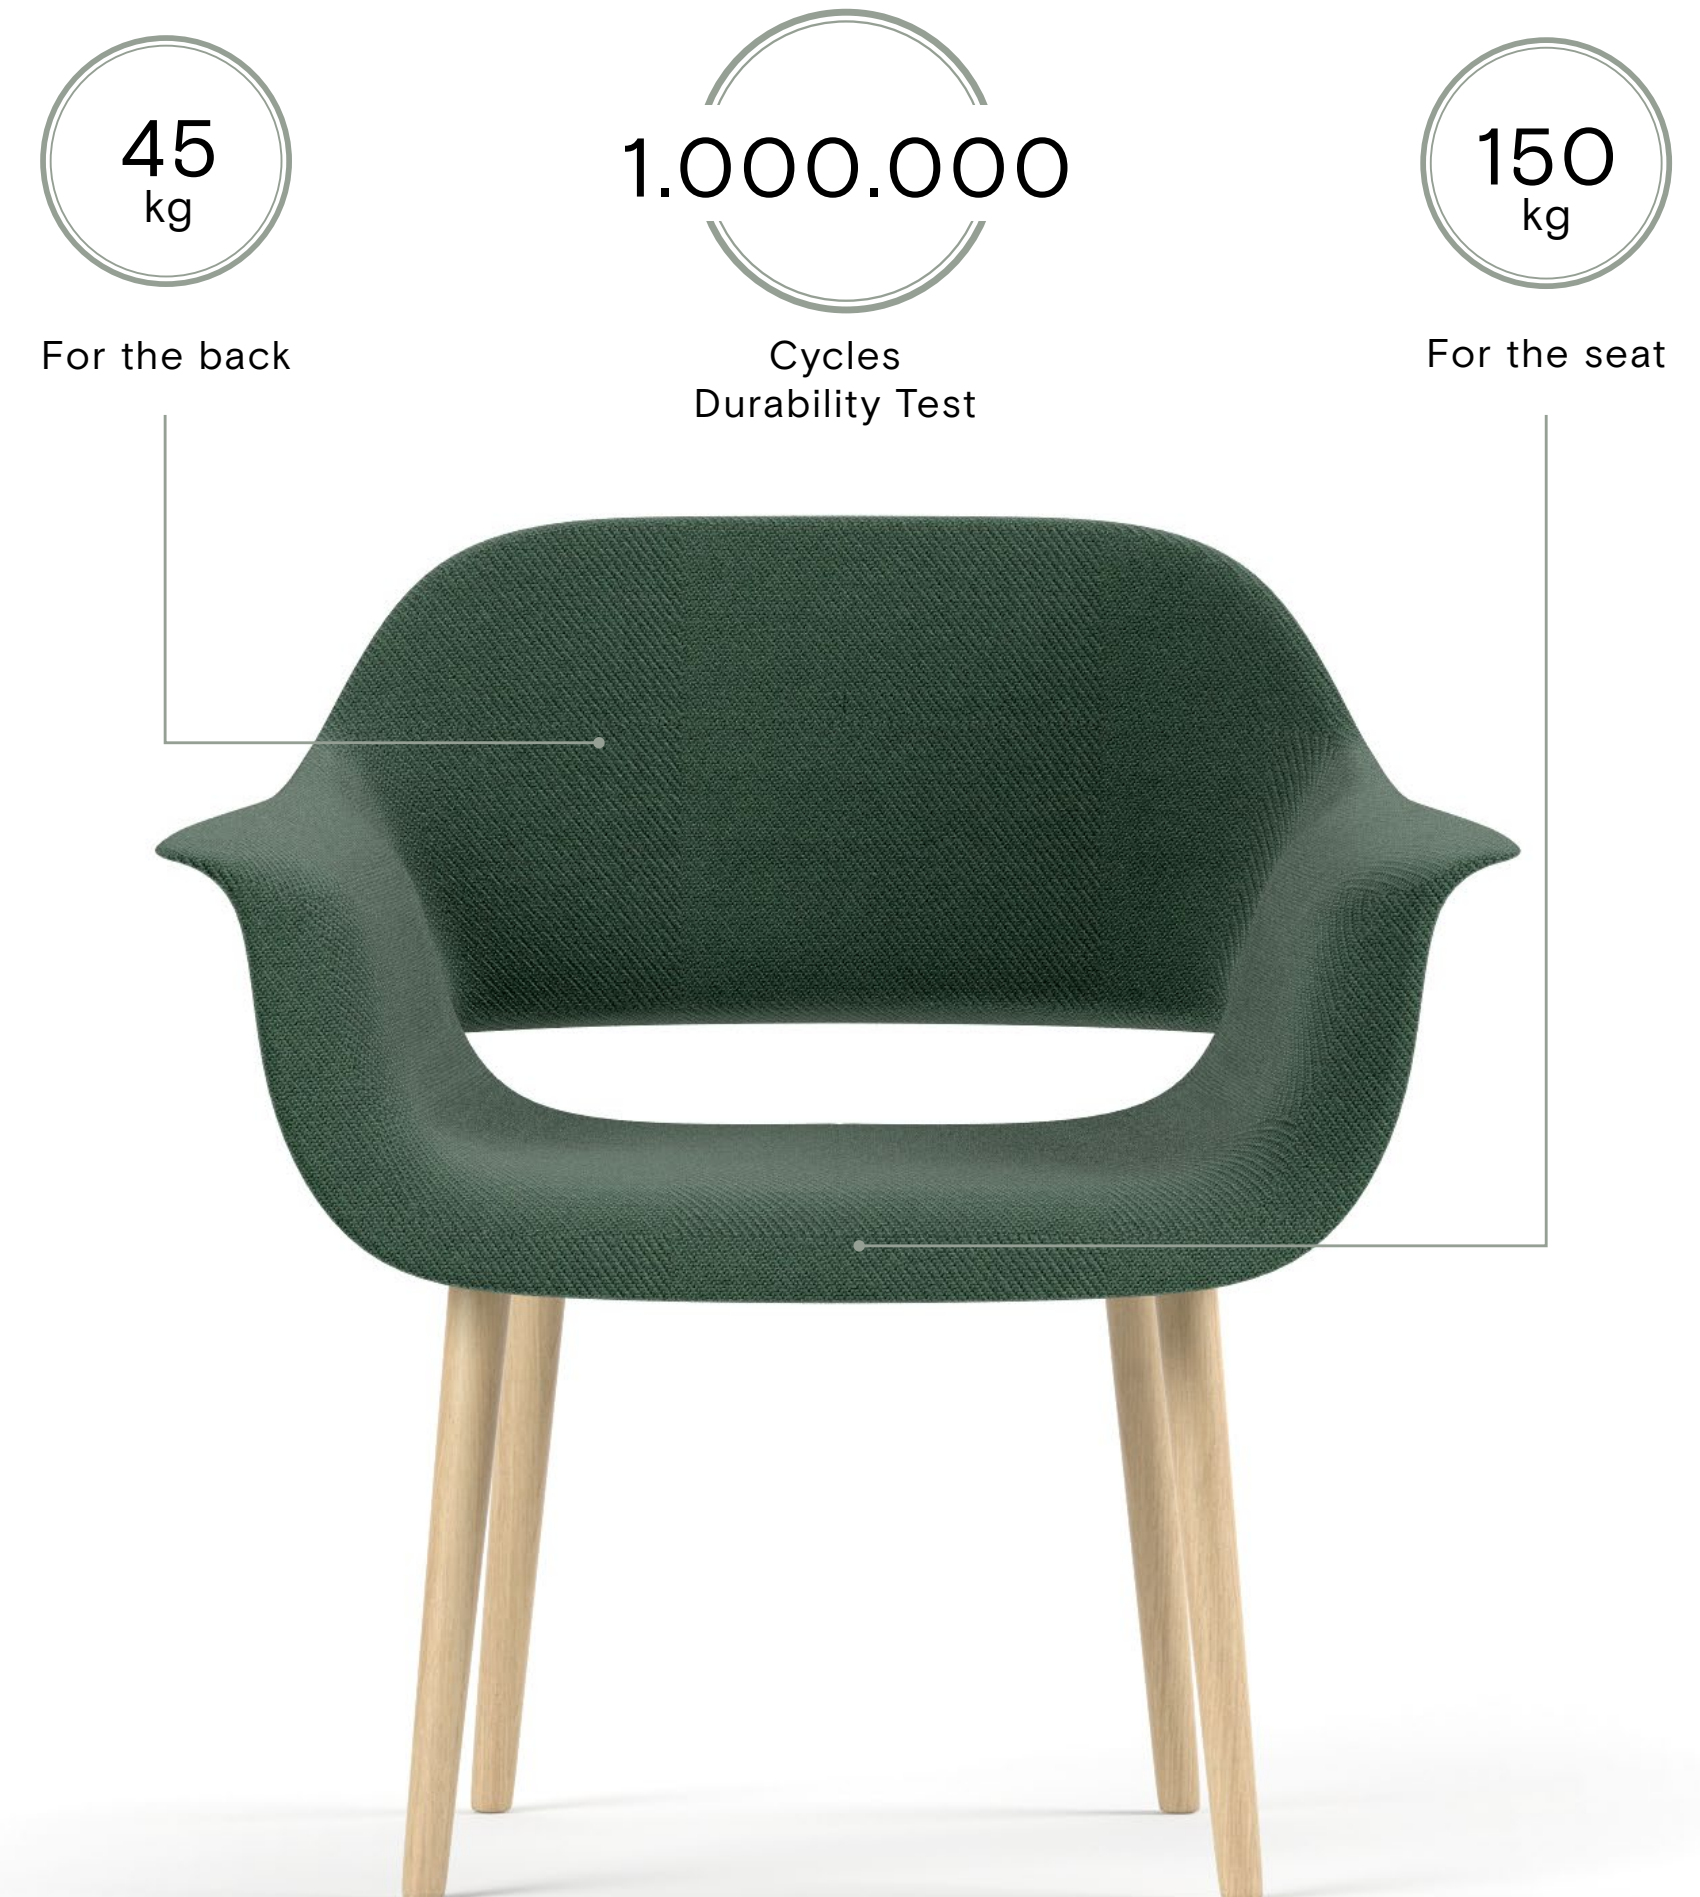

No compromises for the quality of materials. The proposal of KVADRAT fabrics perfectly fits to the shells of our shaped products.

kvadrat

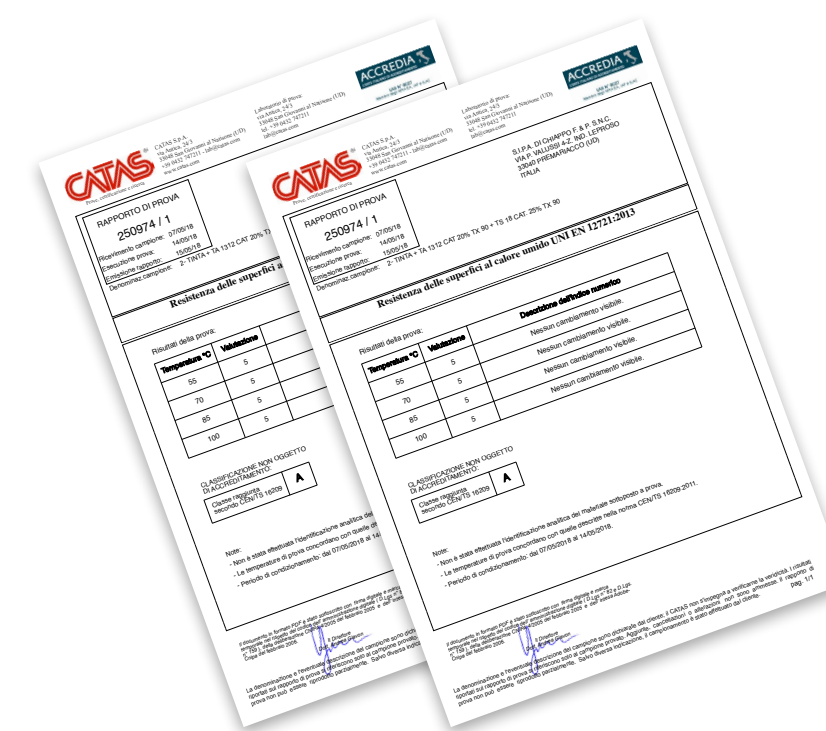

## Unique features

Out of scale resistance-worldwide patented construction system. We raised the bar of durability standards reaching 1.000.000 cycles for EN 16139:2013 and ANSI/BIFMA tests. A new benchmark has been settled.

## High Performance Shells
