FANTIN

Fantin was founded in 1968 in Bannia near Fiume Veneto, in the heart of one of the most important industrial areas in Italy and the whole of Europe. The helm of the company has always remained in the hands of the Fantin family. They have shaped it into a specialist manufacturer of metal furniture and solutions that are renowned on the market for one key value: quality, which in this case means a blend of visual appeal, solidity, functionality and sustainability.

Fantin fue fundada en 1968 en Bannia di Fiume Veneto, en el corazón de una de las áreas industriales italianas y europeas más importantes. La familia Fantin, siempre al frente de la empresa, ha creado una compañía especializada en la producción de muebles y soluciones metálicas, reconocida por el mercado gracias a un valor esencial: la calidad como síntesis de belleza y solidez, funcionalidad y sostenibilidad.

Fantin a été fondée en 1968 à Bannia di Fiume Veneto, au cœur de l’une des plus importantes zones industrielles italiennes et européennes. La famille Fantin, depuis toujours à la tête de l’entreprise, a créé une firme spécialisée dans la production de meubles et de solutions en métal, réputée sur le marché pour sa valeur essentielle : la qualité, à savoir une synthèse de beauté et solidité, fonctionnalité et durabilité.

In use

The attractive, practical items of furniture are the perfect match for every setting: from homes to offices, from shops to factories. Our goal is to help to create environments where people feel comfortable, by catering to their needs and reflecting their personalities. The clean-cut designs intelligently combine versatility and visual appeal.

Muebles bellos, funcionales y perfectos en cualquier contexto, desde la casa hasta la oficina, desde la tienda hasta la industria. Nuestro objetivo es contribuir a crear ambientes donde las personas puedan sentirse cómodas, interpretando las necesidades y la personalidad de quienes viven allí. El diseño esencial combina estética y versatilidad de forma inteligente.

Des meubles beaux, fonctionnels et parfaits dans tous les contextes : de la maison au bureau, du magasin à l'industrie. Notre objectif est de contribuer à créer des environnements où les personnes se sentent à l'aise, en interprétant leurs besoins et leur personnalité. Le design épuré allie intelligemment l'esthétique et la polyvalence.

The Archive

Da luogo statico, legato al passato, l'archivio si trasforma in un sistema multimediale in cui la classificazione storica, di oggetti e progetti, è affiancata da tecnologie digital e social di ultima generazione, dal tablet a Pinterest. In ciascuno dei 9 moduli-scaffale si sviluppa una timeline che parte dagli Anni 50 e arriva a oggi, ricostruendo con oggetti-capofila la storia degli arredi per ufficio: sistemi operativi, lampade, sedute, senza dimenticare la tecnologia, dalle calcolatrici ai computer. Una storia tutta da scoprire, e approfondire, nello storytelling delle bacheche di Pinterest e negli approfondimenti da sfogliare sui device.

Drawing from its static past, the archive transforms into a multimedia system, in which the historical classification of objects is paired with the latest generation of digital and social technologies: from tablets to Pinterest. A timeline within each of the nine shelving units takes you on journey, starting from the 1950s and culminating in the present-day, where the history of office design is reconstructed with iconic objects from the past: operating systems, lamps, chairs, and of course- technology: from calculators to computers. This is a story to discover and explore on Pinterest, by accessing Pinterest boards and by browsing on tablet.

Ad hoc

The entire production cycle takes place in our facilities: this enables us to be flexible and satisfy individual product needs while also carrying out more complex activities for the contract market. We endeavour to breathe life into metal and bring to fruition the creative hopes and dreams of even our most imaginative and visionary customers.

Todo el ciclo productivo se desarrolla dentro de nuestra fábrica: esto permite una gestión flexible que satisface tanto la solicitud de cada producto como las actividades más complejas, relacionadas con todo el proyecto de amueblamiento de los espacios. Nuestro objetivo es darle vida al metal, para satisfacer la creatividad y los sueños de nuestros clientes, incluso los más curiosos y visionarios.

Tout le cycle de production se déroule dans notre usine : cela nous permet d'être flexibles et de satisfaire les besoins liés à un produit donné comme à ceux des activités professionnelles les plus complexes. Nous nous efforçons de donner une âme au métal et de réaliser les rêves et les aspirations créatives de nos clients, même les plus curieux et les plus visionnaires.

Our Vision

A strong Vision supported by a value enhancing business model.

We are the leading platform where innovation, entrepreneurship and education coexist and create contamination: using a digital approach, we support the creation of new business models and the transformation and education of young people and companies. Founded in January 2005, we were the first in the world to adopt a model that combined investments, business consulting and digitally-driven educational programmes in one place.

Now we are a human - centered ecosystem based on a 3-pillar business model that combined together benefit from synergies and interconnections for value creation. Our Campus is an international hub where students and professionals collaborate together in the digital transformation process, is a place for sharing ideas and a privileged point of view on the future, on new trends in the workplace, on technological advancements and on how the digital transformation will change society.

- Partners supported by: CISCO, AUDI, CATERPILLAR, GARRATT, TOSHIBA, INNOVATION, HELBIZ, LG, PRIME, IOT, ASSA ABLOY, AXIS

Amulets

A collection of amulets, each with its own history and meaning, is displayed in a series of glass cases. The amulets are arranged in a way that suggests a journey through time and space, from ancient civilizations to modern times. The display is designed to be both informative and visually appealing, with each case containing a detailed description of the amulet and its significance.
