

The background is a dark navy blue. It is filled with stylized botanical illustrations. Large, broad leaves with prominent veins are drawn with thin, parallel gold lines. Some leaves are also outlined in a slightly darker green. The leaves are arranged in a dense, overlapping pattern, creating a sense of depth and texture. The overall style is modern and elegant, reminiscent of mid-century modern graphic design.

Made in Italy

original and exclusive design, iconic style and taste

Sustainable

recycled materials, fair working conditions and sustainability in Italy and abroad

Turnkey Service

from project to installation, ready to offer a complete service

Handcrafted

the best Italian craftsmen to create unique pieces of design

Maintenance Free

no need of watering or trimming and zero maintenance costs

Top Quality

working every day to meet the highest standards in the market

Tailored

customized creations to meet even the most demanding client

Natural Looking

deep knowledge of nature means faithful replicas

High Technology

hi-tech greeneries with anti-dust system

De Sign
of Nature

Our journey into the world of Interior Landscaping began in 1988 with the creation of the first-ever Seminatural Tree.

Since then, we have successfully combined our exclusive 100% Natural trunks with high quality man-made foliage in a pioneering research of the harmonious synthesis between the natural quintessence and architectural space.

An intense and deep feeling for Art and the desire to restore the bridges that connect humanity to Nature have lead us towards a craft technique simple as well as innovative. A way to reconcile and reinstitute our pure essence, lost in modern times.

The deepest knowledge of Nature meets the Art of Design.

Jungle Concept Design

A delicate equilibrium between the lushness of the forest and the art of interior design is always perceivable in our creations, aiming for the exact emotion that restores the ancient harmony between Nature and Man.

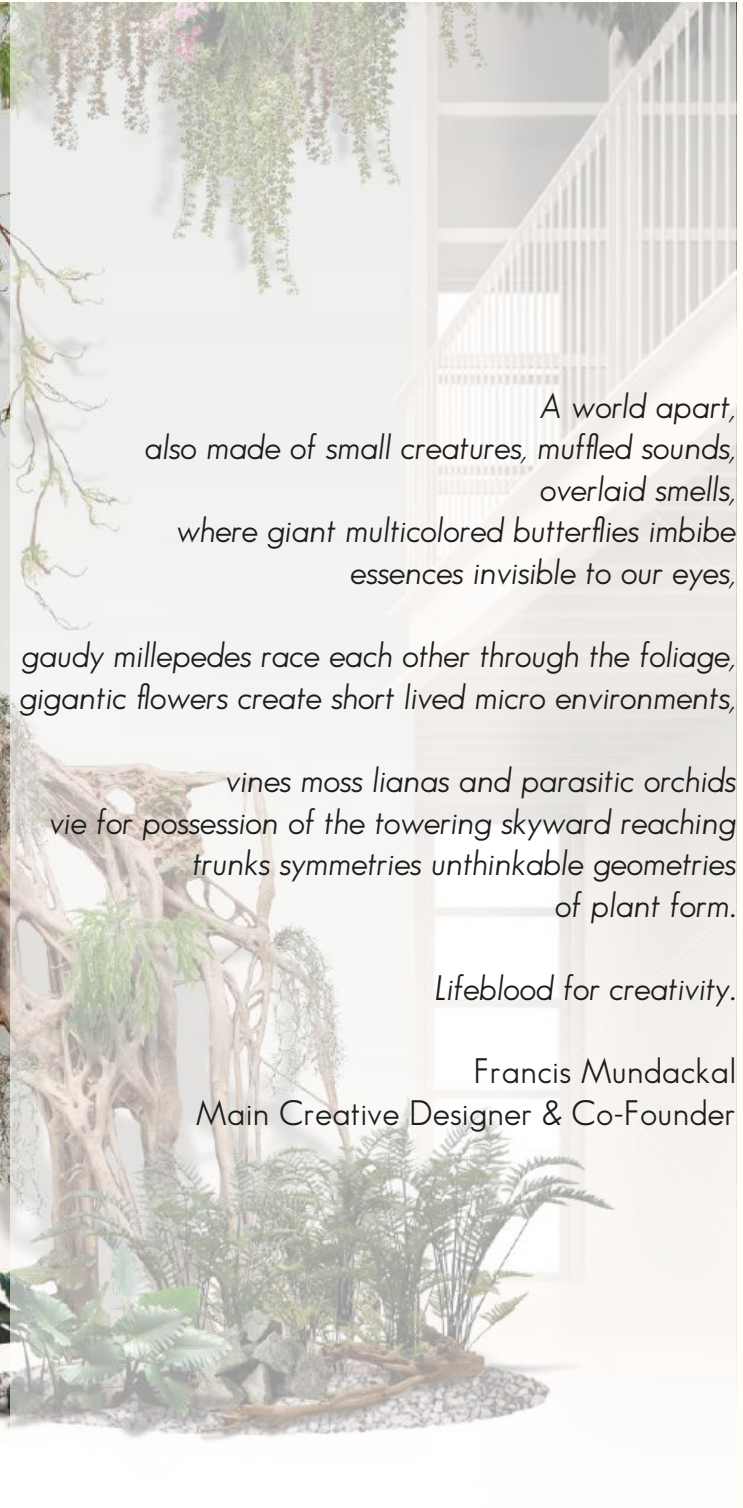

During research into jungles and forests the desire to reproduce their miraculous perfection was born in us, decorating spaces with selected items that harmoniously complement each other.

The task of the larger leaves is to protect small leaves, the smaller leaves grow under the shelter of the larger leaves, plants needing more water grow near to those needing less water, those that need more light grow higher, protecting those that prefer the shade.

All ila creations are inspired by the Jungle Concept Design.

*A world apart,
also made of small creatures, muffled sounds,
overlaid smells,
where giant multicolored butterflies imbibe
essences invisible to our eyes,*

*gaudy millepedes race each other through the foliage,
gigantic flowers create short lived micro environments,*

*vines moss lianas and parasitic orchids
vie for possession of the towering skyward reaching
trunks symmetries unthinkable geometries
of plant form.*

Lifeblood for creativity.

Man Made
Flora

Our unique and exclusive Trees and Vertical Gardens are made with 100% Natural Wood. Natural elements are selected, dried and treated following the highest standards and are subject to anti-age, anti-parasitic treatments which allow our trees to maintain their natural, astonishing look for years.

The trunks that we use in all our Seminatural Trees and Vertical Gardens are carefully and specifically chosen from environmentally-friendly areas and especially from the clearing of zones about to be reforested.

By restoring the trunks and saving them from destruction, ila creations inspire a new beginning. And they crucially do so by reducing efforts and wastages.

ila Seminatural Trees and Vertical Gardens do not need any watering system, any trimming, any fertilizers and do not require any maintenance at all, thus creatively combining comfort with the care of Nature.

True to Nature

ila artificial leaves - an ever-changing collection, constantly updated - are like nuances on a huge canvas on which our artists create their breathtaking compositions.

Colours, shades, silhouettes, textures... the constant research leads us always to use the most innovative materials that prevent dust from settling on the surface, giving a natural shine that remains unaltered over time.

Each ila leaf is designed and created with a painstaking attention to the slightest details in order to always be utterly faithful replicas of the chosen botanic variety.

The deep love of Nature which prompts us to such a high level of research and attention to details finds its necessary completion in the perfect choice of foliage that can fit and suit every specific environment.

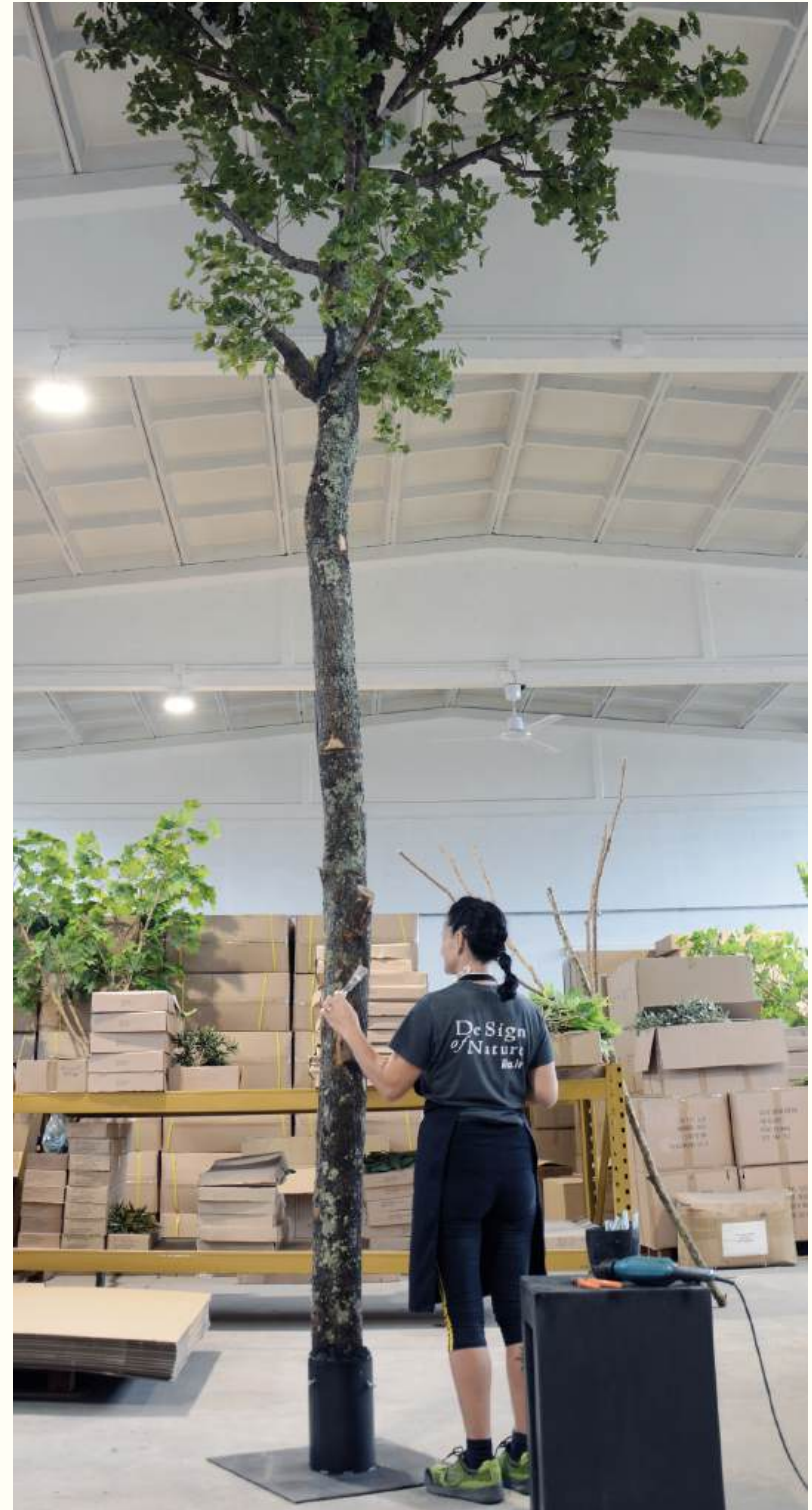

Every ila Tree and Vertical Garden is always consistent with the natural flora and the design philosophy of the space in which it is located.

Proudly Made in Italy

The tastes, smells, musics and sights of Italy provide the inspiration, the intense feel for beauty, the sensitive touch invoked by our creations, true to the authentic soul of Nature's landscape. The craftsmanship with which we produce our Seminatural Plants is authentically Italian and all our Trees are hand-styled and crafted in Italy.

The unique feel perceivable in all ila creations is paralleled only by the high quality of the materials with which they are hand-crafted. The 100% Natural trunks and man-made foliage which distinguish ila's works around the world are researched, designed and crafted not only to enhance their beauty but also for their durability. Our unique trunks undergo anti-parasitic and anti-age treatments and all our collections of foliages are produced with the highest-quality materials so as to allow our trees to maintain their astonishing, natural look for years!

Everything in ila is studied to restore a moment of Nature and to extend a fleeting instant into infinity.

Created to be
Timeless

Every ila Tree is made with natural trunks and carefully selected foliage, handmade by our highly qualified craftsmen, handled with care till its final destination. Every tree is customizable: type of trunk, foliage, height, diameter and much more can be tailored on our customers' needs and tastes.

The perfect balance, the instinctive equilibrium of wilderness and organized space is the golden standard which lies at the soul of our creations. Every ila product is studied in detail to ensure the highest level of aesthetic design, natural look and safety.

The modern art of composition is complete with the ancient wisdom of Nature.

Architectural Gardens

ila artificial and Seminatural Gardens are a unique blend of faithful replicas of Nature and our craftsmen's creativity. Created as a luxuriant work of design, they can fit in the smallest spaces like offices and houses, as well as in the huge walls and ceilings of shopping malls, spas, airports, etc.

Vertical Gardens and Zero Gravity Gardens are the perfect solution for saving space and feeling immersed in Nature: the room ceases to be a living space. It becomes a moment of bliss and meditation; relaxation and forgetfulness of Self.

The intense beauty of our creations is matched by an extraordinary simplicity of use and installation: Nature is not stressed nor exploited with intensive growing, and not a single drop of water goes wasted.

Not only Special,
Unique

Today's world is increasingly nuanced, with complex problems that require solutions beyond traditional frameworks.

The latest collections, such as Ultra Tree, emerge as a testament to Ila's expertise in the realm of interior landscaping. They transcend the conventional boundaries of simple greenery to encounter avant-garde design, meeting the contemporary needs of architects and designers seeking to redefine their creative horizons.

Another innovation developed by Ila, the hybrid landscape, focuses on design quality combined with sustainability. Seminatural plants, tailor-made with 100% natural treated trunks and zero maintenance, meet an undergrowth populated by live plants, either in soil or hydroponics, adding vitality, colors, and scents to the overall design.

*Nothing is Art if it does
not come from Nature.*
