At **ila** we combine the most advanced instruments and technologies with the spirit and passion that make Italian craftsmanship renowned all over the world.

Vertical Garden: the new frontier of Design

Despite having appeared for the first time back in 1986, Vertical Gardens (also known as Green Walls) have recently become a staple in modern architecture.

The wish to educate society to a renewed contact with the environment has certainly been a key factor in the increasing request for this architectural feature that we have witnessed in the last few years.

It's easy to see the advantages that the use of artificial and seminatural plants can bring to the design and concept of Vertical Gardens, both in terms of saving costs and beauty.

As a matter of fact, one of the major hindrances of natural Green Walls is the complexity of the installation and maintenance of irrigation systems which entails high costs to place and keep the greenery in a good state.

ila Seminatural Vertical Gardens can offer all the advantages and beauty of a natural feel while doing without the often prohibitive costs of natural green.

Our Seminatural trees, plants and Vertical Gardens are easy to install, ready for the use and do not need any irrigation nor any maintenance work.

Whereas plants and flowers on green walls tend to naturally rot, fade and have to be replaced on a regular basis, Vertical Gardens by **ila** are truly timeless creations, faithful replicas of nature that will keep their astonishingly fresh look for years, unaltered by time and seasons.

Vertical Gardens by **ila**: Portaits of Nature

Like all our collections, Vertical Gardens by **ila** are a unique blend of faithful replicas of Nature and our Craftsmen creativity. Created by our expert team as a luxuriant work of design, they can fit in the smallest spaces like offices and houses, as well as in the huge walls of shopping malls, spas, airports, etc.

Each of our still-lifes is specifically designed to evoke different feelings in the viewer, thus harmonizing the indoor space with the surrounding walls in a perfect balance.

ila “essences”— an ever-changing collection, constantly updated with new exciting products – are like nuances on a huge canvas on which our artists create their breathtaking compositions.

ila’s portraits of Nature are “painted” with an infinite and inexhaustible colour-palette. It is, in fact, the material itself of Nature which provides the base and the initial instinct that is palpable behind every creation by **ila**.

Taking unbound, limitless Nature as its mirror, **ila**'s collection of Vertical Garden items and "essences" is actually an ever-growing, always updated collection, constantly improved by our Research team.

So each Vertical Garden by **ila** is a unique piece; colours, shapes and light and shadow plays can be freely exploited by our Designers to enhance the beauty and harmony of the space around us.

Green Stream

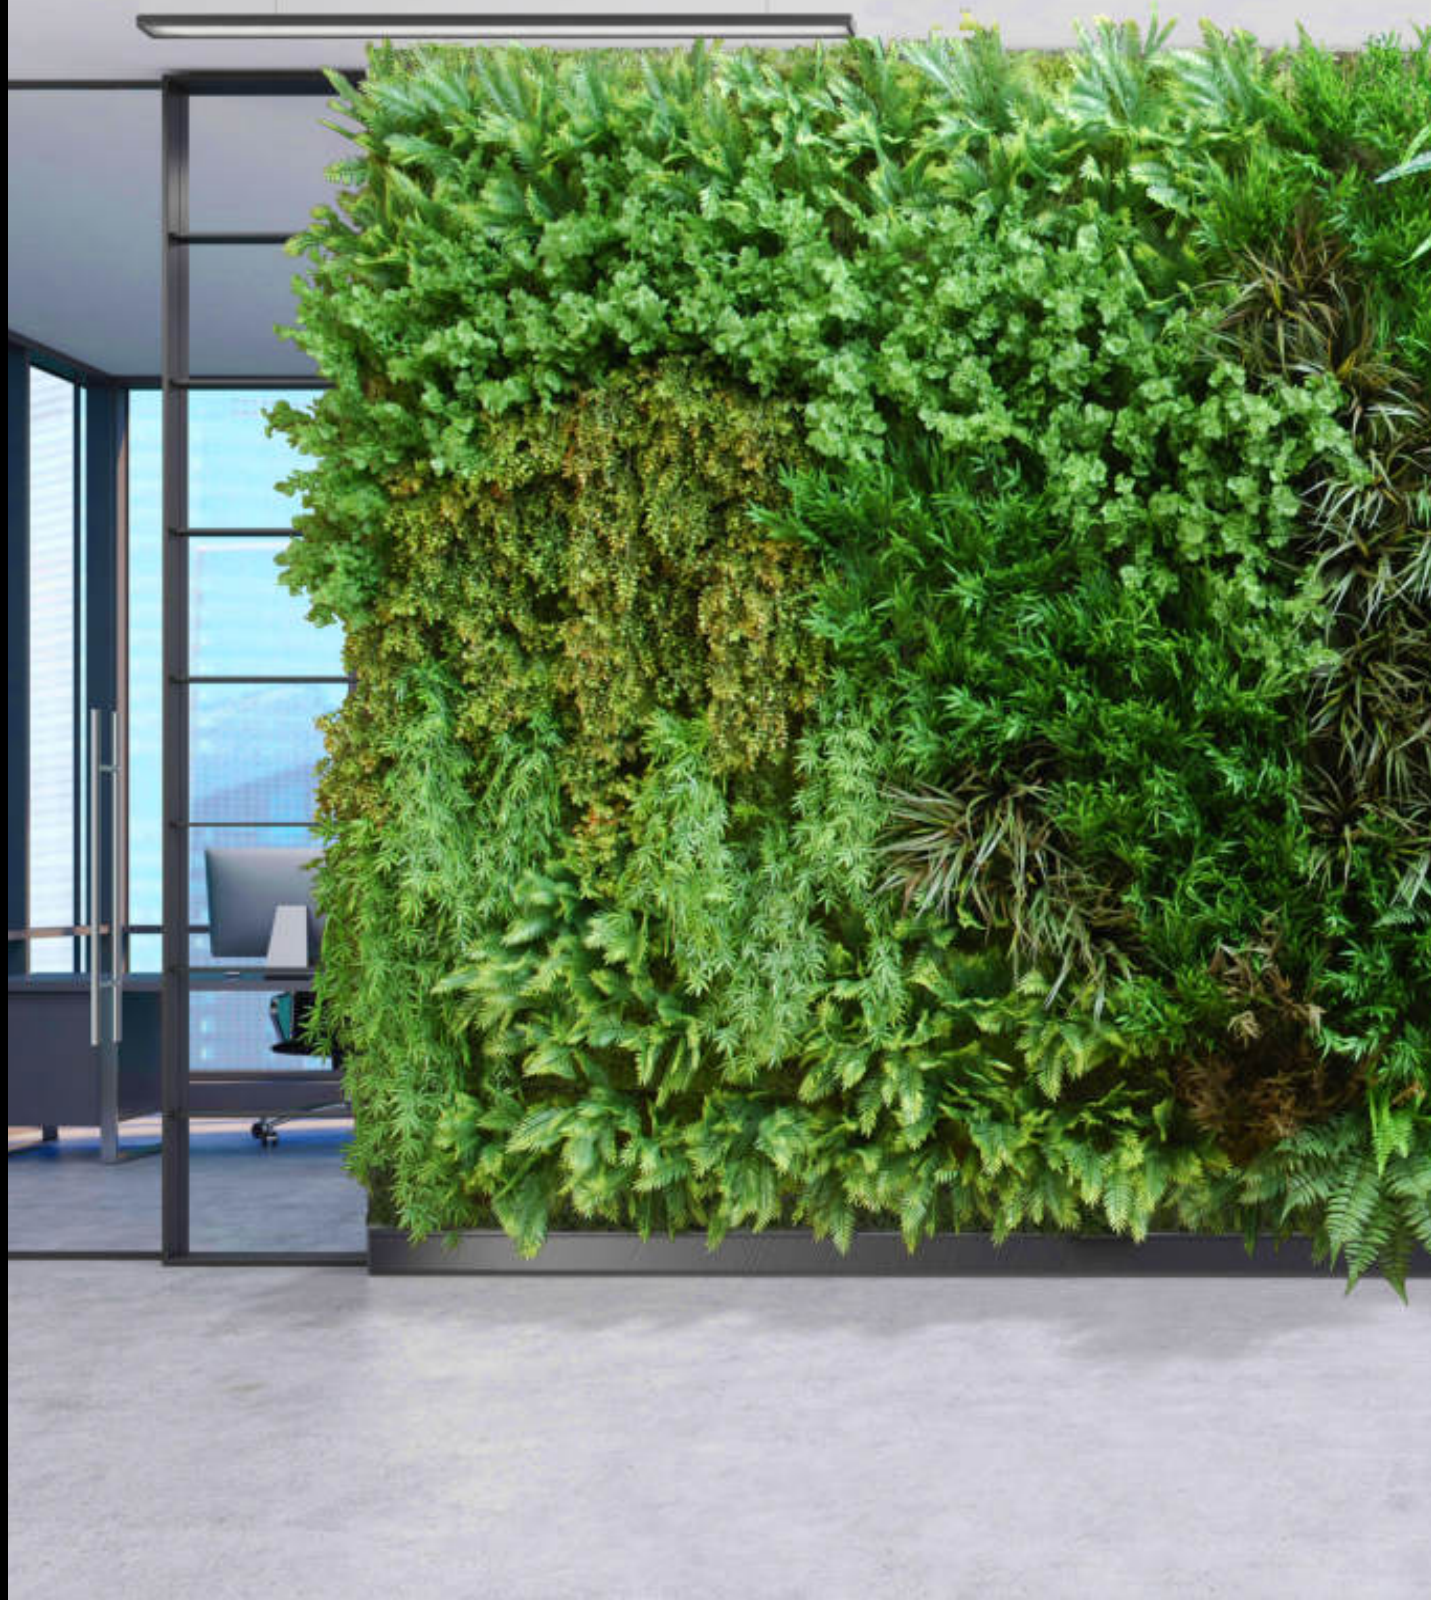

“

**Come forth into the
light of things,
let Nature be your teacher.**

William Wordsworth

The sweet natural silence can naturally be experienced only by an ear and eye finely attuned to the sounds and sights of Nature.

Green Stream by **ila** is our latest attempt to create a poem with the language of Nature that evokes those calm, soothing sensations that only the various hues of green can elicit in the heart of Man.

Green Stream by **ila** is the perfect feature to create a peaceful, relaxing atmosphere in your spas and offices, and to ease our minds – always too much busy in the modern world.

Evolution

“

So the universe is constantly moving in the direction of higher evolutionary impulses, creativity, abstraction, and meaning.

Deepak Chopra

The concept of Evolution lies at the very heart of our own existence as human beings.

The grandiosity of nature and its instinctive vocation to expand are celebrated with the creation of Evolution by **ila** that will put the beholder in direct, unmediated contact with lush, unrestrained Nature and gives the feeling of being naturally immersed and overwhelmed by its forces.

Suitable for very big sizes,
specially created for shopping
malls, halls, lobbies, etc...
Evolution by **ila** effaces and
redefines the actual boundaries
between Nature and Culture,
Indoors and Outdoors, the space
of design and the design of
creation.

that exists in dresses only**

Coco Chanel

Plein . Air

“

Just try going outside...
... all sort of things
happen then

Vincent Van Gogh

ila's goal and mission has always been to merge Nature and Design, human self-conception of space along with the natural spaces typical of all kinds of Flora.

In a further development of this exciting continual research, **ila** is now ready to make the next big step and transfer its mastery for the Natural Design to outdoor spaces and exterior environments.

Inspired by Nature at its wildest state, all our creations have succeeded in capturing her powerful essence, thus erasing limits and boundaries that shape our reality and our lives: what's in and what's out, natural and artificial, etc.

The Vertical Gardens Plein Air have been created with the most advanced techniques and materials. UV Resistant leaves will maintain the same beauty for a long a time even if exposed to sunlight, rain and weather changes.
