

personalization

By combining hand-made and modern technologies, we give our clients the opportunity to individualize products, and thus the opportunity to emphasize the uniqueness of the designed spaces. At Motiv Home, we run the full production process ourselves, thanks to which we can create products that perfectly match their interiors. We believe that with our participation, we create furniture that will delight customers for many years.

our values

At Motiv Home, we value durability, beauty and creativity, which is why we cultivate these values in creating our company and products. Every day at work we use the latest tools available for the production of upholstered furniture, but at the same time we continue the traditions of furniture crafts with respect for people and nature around us. We are passionate about creating unique, constantly new forms and solutions that make our clients' interiors unique.

production

people

Each piece of furniture that we produce passes through at least 10 pairs of human hands. Many of them have been creating furniture for several dozen years. All of them are local craftsmen, carpenters, seamstresses, tailors, upholsterers who have lived and worked in the Greater Poland region for generations, often working in the production of furniture.

place

Poland is the second largest furniture exporter in the world and the first in Europe. Last year, Polish furniture went to over 150 countries all over the continent. This is mainly due to competitive production costs, geographical proximity to important markets, developed technological production and logistics facilities, large wood resources in Poland and in neighboring countries, but certainly also the long traditions of furniture craftsmanship in Poland. Motiv Home has been producing furniture since 2008, but a large part of the staff has even longer experience in the trade, sometimes reaching the 1980s. Motiv Home products find their customers in over 30 countries, serving both in domestic and in commercial interiors.

working with us

Motiv Home offers professional services in the field of design and implementation of commercial interiors. For nearly 15 years, we have been a reliable partner in the process of furnishing hotels, restaurants, offices, student accommodation and care homes. We care about the highest quality of craftsmanship and original ideas for interior arrangement. We provide comprehensive services: from the preparation of a well-thought-out design, through furniture production and assembly on site, to post-project service. Always in line with the set deadline and budget.

Objectivity, Wrocław,
office spaces

We believe that a good hotel is not only about the right location, professional service or great kitchen. It is also, and perhaps above all, a functional and spatially logical facility with a friendly and individualized interior design. That is why we understand our task not only as the delivery of furniture, but above all as advising clients on how to achieve the intended results by selecting the right equipment and using the right materials. Create the image and character of an object, build its recognition thanks to individual design solutions, and thus increase its income. Efficiently, that is, at a reasonable cost.

MOTIV HOME offers a whole range of possibilities

By cooperating with your investments we propose:

- preparation of an initial concept of furnishing along with a valuation
- creation of an interior design with 3D visualizations
- production of furniture according to own or entrusted projects
- transport and professional assembly of furniture at the investment site

We do not set any restrictions for you: unusual dimensions? Higher backrest or deeper seat? Unique fabrics and finishing materials? For most products, this is not a problem for us.

sustainability

Heave-duty design

We focus on a well-thought-out process of designing and constructing furniture, which enables the creation of durable products. In addition to a sturdy, we care for solid packaging made of recycled materials, which prevents damage. This in turn translates into minimizing unnecessary re-deliveries. Our constant commitment and care for the durability of the furniture that we produce is aimed at using only the necessary sources of energy and materials.

Sustainable production and technology

Cooperation with local suppliers ensures high quality of the materials used and a minimum impact of production and supplies on the environment.

We want future generations to be able to live at least under the environmental conditions we have today. That is why we use wood from certified and local sources that guarantee sustainable forest management and reduce our carbon footprint during deliveries.

Natural materials

We believe in natural materials. Their perfection and diversity will never cease to fascinate us and arouse the will to understand them. For generations, we have been gaining experience in the processing of wood, steel and leather. It is easy to see how it affects the uniqueness of the final product.

quality

We believe that quality is a key element of sustainable development, which we control throughout the entire production process. A product that will serve you for decades ultimately saves resources. We guarantee the durability and stability of our products through a series of tests conducted in accordance with European Union standards.

ecology

We treat natural raw materials with respect and care for their economical use in the production process. Thanks to systematic training of employees and rigorous internal audits, we try to reduce the amount of useless waste. The aim of the Motiv Home ecological policy is not only to meet the legally imposed restrictions, but also to strive for a minimum burden on the natural environment. By using water-based paints and varnishes, we minimize the emission of organic compounds that may adversely affect the human immune system. We only use board materials with E1 hygiene certificate, confirming the low formaldehyde content.

optimization

Thanks to the investment in optimized fabric cutting technologies using the cutter device, we have significantly reduced the waste and the amount of raw material needed for production. However, thanks to the use of solar panels, we save nearly 35% of the energy used in the production process. Motiv Home is actively committed to improving this by further increasing the use of solar-powered technology.

testimonials

We are constantly gaining new experiences and expanding group of our satisfied customers. References from them prove the highest quality of services, professionalism and competence of the MOTIV HOME team.

Olga Saran-Collins, Head of Operations and Supply Chain at David Phillips, London, UK

David Phillips FF&E worked in partnership with Motiv to supply bespoke furniture to several sizeable student accommodation projects.

Motiv's support during early bid stage and supply has always been of great benefit to David Phillips FF&E's successful completion and handover.

Even though their manufacturing base is in mainland Europe, the deliveries have been to the day which given the events of Brexit and COVID is truly remarkable. The resource levels and work attitude from Motiv's team have been, likewise, outstanding.

**Maciej Kowalski,
Meble VOX**

We gladly recommend MOTIV HOME as a supplier of upholstered furniture for hotel facilities. We appreciate advice on the selection of fabrics, flexibility related to the modification of sizes for furniture dedicated to investments and timeliness, which is so important in the contract market.

**Bartosz Konieczny
HOT_elarnia******

I recommend MOTIV HOME as a reliable, trustworthy and prepared to sell products company from the furniture industry. Experienced staff and organizational potential with high level of services provided. The planned products were made by providing the design, ensuring the possibility and setting a deadline. We recommend Motiv Home.
