*Swivel and
visitor chairs*

Who we are and what we do

Sedus Stoll AG was founded in 1871 and is one of the leading European manufacturers of office solutions. The product range includes seating furniture, such as swivel and visitor chairs, as well as office, conference and contract furniture – all “Made in Germany”.

The company headquarters is located in Dogern on the High Rhine in southern Germany. Another production site is in Geseke, North Rhine-Westphalia. Sedus is a company with a long tradition and 150 years of company history that has repeatedly set standards – in terms of ergonomics, manufacturing processes and sustainability. As a synonym for innovation, technology and aesthetics, Sedus constantly enriches the “office world” with new product ideas and contemporary concepts. Sedus puts a strong focus on current trends and changes in the world of work. New organisational structures and forms of work require flexible, aesthetic furnishings and custom-made solutions that enhance collaboration, communication and movement. A particular emphasis is placed on the health and well-being of the users.

black dot

Dynamic sitting in a nutshell

The central design element of the backrest embodies the function of this exceptional office chair family: the dorsokinetics developed by Sedus.

Powerful technology, maximum freedom of movement, unique design – black dot swivel chairs have a lot to offer. This also includes a wide range of individual configurations, which allow for a variety of uses in the office. As all-round office chairs, they help to bring performance to the maximum and stand out in any working environment.

FORM AND FUNCTION

Maximum freedom of movement

The backrest is connected to the aluminium support via a flexible joint so that it can perfectly follow the movements of the upper body in all directions, even during extreme sideways movements. With so much freedom of movement, it encourages a change of posture, as recommended by the ergonomics of today. After all, those who are free to move can also think freely.

black dot follows even sideways movement of the upper body

Dorsokinetics

What's unique about Sedus' patented dorsokinetic mechanism is that the backrest is attached at only one point by a flexible joint. Where other chairs are rigid, black dot is dynamic and supports the back, even when swivelling or turning to the side.

Sedo-lift mechanism

Even in its lowest setting, this worldwide patented seat height adjustment ensures a soft, back-friendly cushioning when sitting down. A steel spring absorbs the 'shock' of sitting down, regardless of the selected seat height. The gas spring is thus relieved of load and is, therefore, particularly durable – the 30-year Sedus warranty conditions apply.

“Similar” mechanism

Perfectly matched mechanical springs provide particularly balanced movement patterns in full synchrony with the body in dynamic sitting. The backrest remains in constant contact with the upper body.

Perfect ergonomics point by point

At Sedus, we are committed to developing groundbreaking innovations for the further development of seating ergonomics. Ingenious technology, excellent individual adaptation and sustainable, smooth operation are the hallmarks of the black dot product family.

Follows the most stringent requirements, is state of the art and provides comfortable seating for everyone. With the new office chair DIN EN 1335-1:2023 Type A standard, black dot meets the requirements for a diverse user base and their various demands.

Multiple functions due to the many options

In addition to its perfect ergonomics, black dot stands out with well thought-out details that complete the ergonomic sitting experience.

1. The basic version of black dot offers height-adjustable armrests; 4D armrests with soft-touch pads are optionally available
2. Leaning back is part of sitting in motion – it's best if there is a neckrest to support the muscles
3. The laterally air-permeable seat and backrest cushions ensure pleasant sitting comfort
4. With the seat depth adjustment of up to 60 mm, your thighs sit just right, no matter what size you are. The seat pan always remains in the right ratio to the backrest. Furthermore, the seat can be tilted by up to 4 degrees
5. There are various lumbar support versions for the backrests of black dot chairs

Classic upholstery comfort or transparent lightness

In addition to the well thought-out backrest concept, full upholstery or membrane, as well as seat cushions, provide the best comfort. Complemented by an intelligent mechanism, the sitting experience is now made perfect.

black dot

It always makes a good impression with its comfortable upholstery. The sophisticated upholstery technique and the first-class finish enhance the high-class character of this chair family

black dot net

The airy, breathable mesh membrane in the backrest gives it a particularly slim and light appearance. The mesh ensures optimal pressure distribution according to individual body weight

Sedo-lift III

The robust seat height adjustment is virtually wear-free, even when used by a variety of users. Even in its lowest position, it ensures soft, back-friendly cushioning when sitting down. Furthermore, it comes with a 30-year guarantee.

A swivel chair with extra strength – black dot 24

black dot 24 is available for users with a weight of up to 150 kg. This special version also meets the high demands of use in 24-hour workplaces, for example in control centres or reception areas. black dot 24 has a standard sliding seat with thicker and wider seat upholstery, the “Similar” mechanism with reinforced springs and 3D adjustable armrests.

VISITOR CHAIRS

Working and communicating in the same design

The black dot line is complemented by comfortable conference and visitor chairs in a consistent design, be it the sophisticated upholstered look or the charming lightness of the mesh version. Both four-leg and cantilever models are available.

With matching black dot visitor chairs, the office interior can be designed in a uniform yet variable style at the same time

Individually designed

In addition to the numerous technical options, black dot colours can also be designed entirely according to personal preferences. There are almost endless possibilities for combination. The individual colour designs of the frame, base, seat upholstery and backrest upholstery and membrane create countless variations.

Backrest upholstery (black dot)

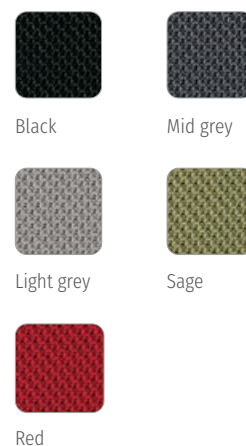

The backrest upholstery is available from the entire Sedus fabric collection. Different covers for the seat and back are possible

As diverse as its surroundings

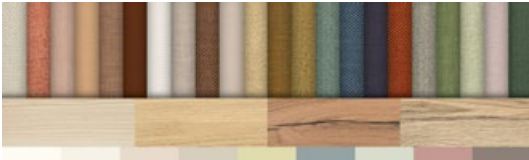

A harmonious working environment contributes significantly to well-being and productivity. Well-conceived furnishings, pleasant fabric and material combinations as well as the choice of colour accents are key factors for achieving this goal. Whether Smart Balance, Soft Being, Urban Living or Multi Creation – black dot swivel and visitor chairs can easily be adapted to any of these colour schemes.

Do you need support in planning and implementation?

The experts from the Sedus Workspace Design team are looking forward to helping you design your modern smart office. From analysing the floor plan and designing the concept to choosing the colour from the Sedus Colour Cookbook – everything comes from a single source.

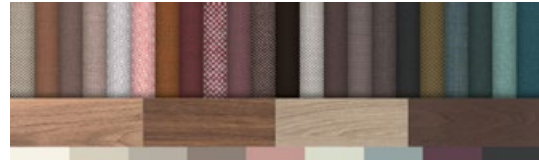

Smart Balance

light, reduced, calm, structured, functional, technical

Urban Living

comfortable, respectable, elegant, urban, intense, timeless

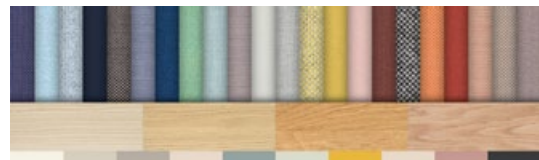

Soft Being

gentle, calm, balanced, natural, inviting, regenerative

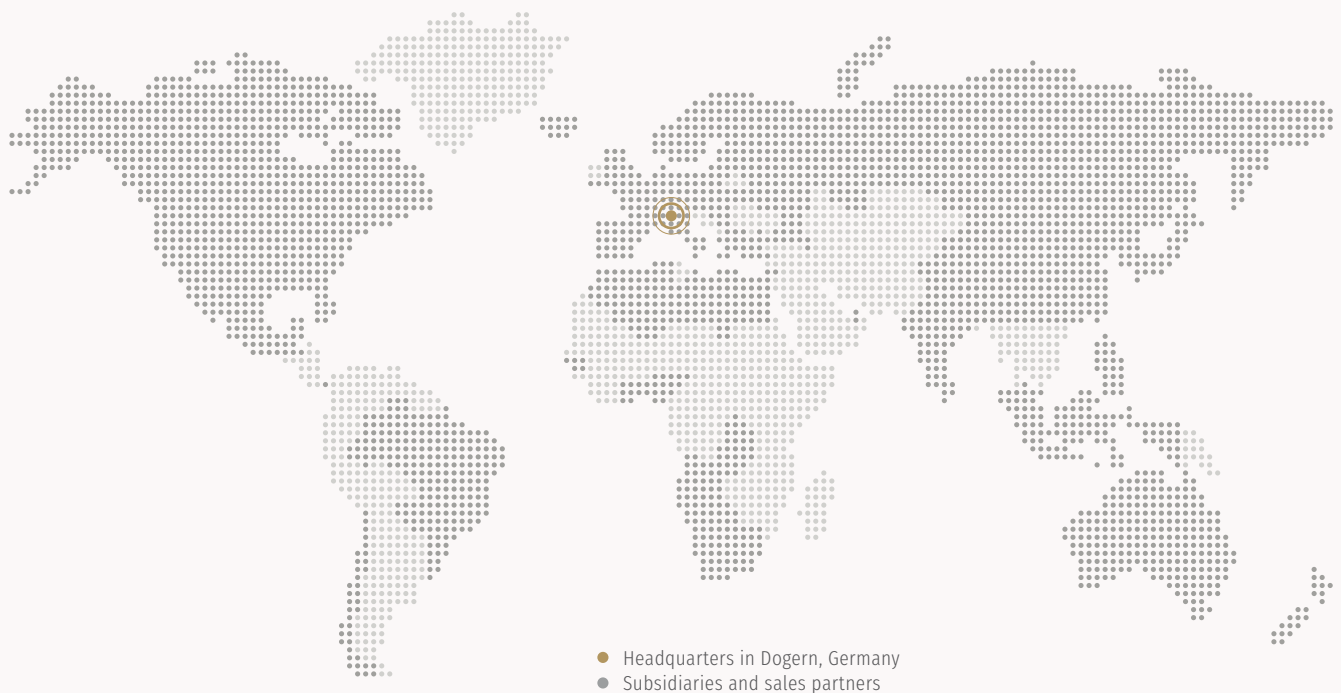

Multi Creation

motivating, inspiring, creative, dynamic, active, open, free
