

BONALDO

Musa

Designer: Spazioameno

Musa is a collection of mirrors that result from the coming together of different elements: on the one hand there is the transparency of the mirror surface which reflects reality and at the same time refers to illusory worlds, while on the other there is the solidity of the wood that frames it. The Musa collection is best characterized by the rhythmic materiality of the wood, a ribbed walnut that

gives three-dimensionality and dynamism to the mirror. The rectangular version is also characterized by the rotation of the reflecting surface with regard to the perimeter of the frame that contains it, creating an original effect on the wall where it is hung. Musa is also available in a round version.
