

Our Pact with Nature

“ We must connect the dots between climate change, water scarcity, energy shortages, global health, food security and women’s empowerment. Solutions to one problem must be solutions for all

Ban Ki-Moon

Against the Industrial Grain

*Old-Fashioned Habits to Restore the Balance
between Man and Nature*

The harsh, uncomfortable mindset of the modern era is markedly characterized by the human interference (should we say antagonism?) to the peaceful flow and cycles of Nature. Upon the altar of the basest human aspirations ALL is tragically sacrificed. All feelings, all beauty, all kinds of thriving environment are mercilessly destroyed.

The main goal of **ila's 30 years' research in indoor landscape design** has always been to restore the balance between Man and Nature, to retrace, mend and restore those bridges that connect us to our Mother Nature by introducing a feel of Natural Green within the artful spaces of living, thus making our daily lives more attuned to the key and nuances of the environment.

At **ila** we view **Sustainability** not as an end in itself but as a path, an **inspiration** and a **challenge** to achieve always the best not only for our clients but also for the global community.

The Other Side of Exploitation

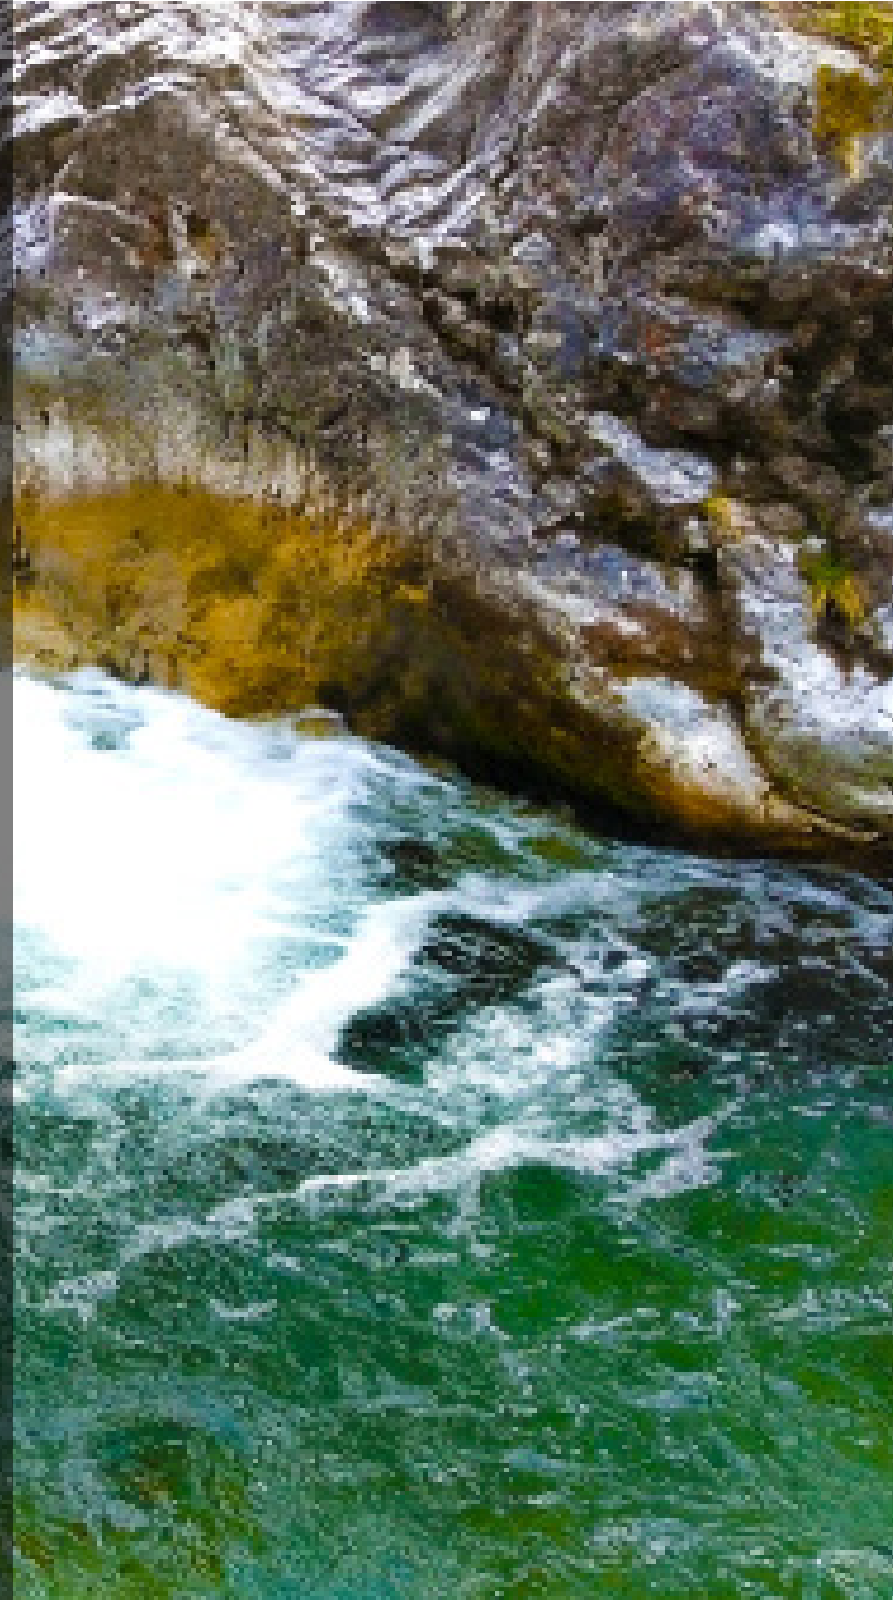

A Gentle, New Breath of Life

In sheer contrast to the inconsiderate approach of industrial quantitative production, at **ila** we favour the integrity and the evident advantages of a slow and gentle approach to the times and cycles of Nature. And it all starts with the **careful choice of our 100% Natural Trunks**.

The trunks that we use in all our Semi-Natural Trees and Vertical Gardens are carefully and specifically chosen from **environmentally-friendly areas** and especially from the clearing of zones about to be reforested. By restoring the trunks and saving them from destruction **ila** creations inspire a **new beginning**.

After the necessary sanitary treatments, to prevent rotting and infestations of parasites, **ila**'s exclusive and unique 100% Natural trunks find a new cycle of Life and a new Purpose in becoming breathtaking **objects of Décor and Design**.

What once was pristine and vibrant defeats time itself and lives on in the form of a natural work of art.

Saving with Grace

The SemiNatural Challenge against Wastages

The lushness of the Amazonian Forest, the poetical tranquility of the Saharian desert oasis... the peaceful and inspiring feelings conveyed by Nature at its wild, pristine state are and will always remain unmatched by any human attempt to domesticate them in an aseptic, artificial environment.

By combining **faithful replicas** of natural foliages with its exclusive **100% Natural trunks, ila** replicates and repaints – rather than trying to encapsulate – the innumerate quintessential feelings that can be conveyed by Nature.

And it crucially does so by reducing efforts and wastages for the maintenance of such green creations. **ila** Semi-Natural Plants and Vertical Gardens, in fact, do not need any watering system, any trimming, any fertilizers and **do not require any maintenance** at all, thus creatively combining comfort with the care of Nature.

A creation of **Art, Love and Passion** always gives good fruits... and over the years **ila** has repeatedly succeeded in combining sustainability with the Art of **Indoor Green Design and Landscaping**.

Made in Italy

original and exclusive design,
iconic style and taste

Sustainable

recycled materials, fair working
conditions and sustainability in
Italy and abroad

Turnkey Service

from project to installation,
ready to offer a complete
service

Handcrafted

the best italian craftsmen
to create unique pieces of
design

Maintenance Free

no need of watering
or trimming and zero
maintenance costs

Top Quality

working every day to ensure
the highest standards in the
market

Tailored

customized creations to meet
even the most demanding
client

Natural Looking

deep knowledge of nature
means faithful replicas

High Technology

hi-tech greeneries with anti-
dust system
