

LITE
Folding Table
By Broberg & Ridderstråle

OFFECCT

PRODUCT INFORMATION

The Lite table is designed for conference rooms in many different environments, and is a development from the chair Lite. Lite comes in different sizes and by placing them together symmetry is created giving the impression of a bigger table. The table is foldable and due to its light weight easy to handle by one single person. A front panel can be added to the table in any desired color or in a black mesh. The front panel reinforces the integrity of the person sitting at the table and provides more design possibilities.

"Tables in this category are often rather dull, and it was extremely important to us to create a more interesting and compelling table compared to other tables on the market", says Johan Ridderstråle.
