OFFECCT

## PRODUCT INFORMATION

"Stackable chairs are often narrow and characterized by a slightly anxious expression. We wanted to create a chair with an inviting wide back that nevertheless could be placed close together. The comfort has also been an important ingredient in the development process", says Mats Broberg.

Lite can be fitted with accessories such as an armrest and a foldable writing tablet. It is possible to connect multiple chairs with a linking device. Lite can also be equipped with removable upholstery for the back and seat, where the removability makes it possible to use the chair also when the upholstery is being cleaned.
