The inspiration behind Milos is nature, and Massaud has managed to reflect this through his choice of materials and varied textures. Wood and polyurethane make up the modular sofa and the two armchairs in different designs that invite you to sit back and relax. Light cement combines with wood to form the low tables, which together with the rotomoulded planters, with a stucco finish, give a rustic aesthetic to the ensemble.

“Milos different pieces are like a collection of rocks gently shaped by winds and waves that create a typical Mediterranean landscape. I wanted to evoke the original identity of Vondom, born between the sea and the mountains in Valencia. A non-Cartesian planning that you can combine organically, as life on a reef.”

Sophistication and exclusivity describe the lifestyle of that society that Scott Fitzgerald masterfully portrayed in his famous novel, *The Great Gatsby*. The idea of living in this era evokes a sense of mystery, intrigue and luxury that inspire this Hamptons collection.

The warmth of this collection is represented by materials such as the wood on which its arms rest or the fabrics stretched over its structure of polished metal bars. Its striped patterns take us directly to the sand on which we are reminded of hammocks and ephemeral constructions built from simple crossbeams and stretched fabrics that we can feel vibrating in the breeze.

“A set of pieces that inherits that
Hamptons aesthetic from those latitudes
of Long Beach where wealthy New York
families spend summers and weekends
by the beach.”

by Ramón Esteve

Tablet's versatility can be seen due to the collection's capacity to adapt to different surroundings, creating a reticular composition derived from the sectional's juxtaposition where the compositing freedom is the main goal. The upholstery, made of independent sections, allows you to create different shapes, which always keep visual consistency.

VONDON

REVOLUTION

Our Revolution

We create outdoor atmospheres to ensure we all enjoy nature, the outdoor plants, the fresh air, and the sea. For this reason our duty is to care for and protect our environment.

We created our own Revolution. A decade ago Vondom burst into our lives launching it's new avant-garde products. Hand in hand with the best designers in the world, these products were thought of to ensure a better future. We lead this revolution in the furniture industry by implementing eco-intelligence and sustainability.

Our goal is to contribute to the recovery of our Mediterranean scenery, transforming wasted and scattered plastic into long-lasting and recyclable products.

Save Posidonia

At Vondom, we believe in the commitment to give back to the planet everything it has given us and we are convinced that sustainability is our responsibility. As a company committed to the environment, we are aware of the importance of “posidonia”, the marine lung of the Mediterranean sea, for the planet. For this reason, we collaborate with Fundació Oceanogràfic València for the protection and conservation of posidonia in the Mediterranean coasts. We want to do our part to guarantee a sustainable future and protect our marine biodiversity.

Designers

We travel the world until we find the best ambassadors of the Vondom spirit: Fabio Novembre, Stefano Giovannoni, Eugeni Quitllet, Ora-ïto, Ross Lovegrove, Karim Rashid, Javier Mariscal... Renowned designers and architects from all over, it doesn't matter where. What counts is their passion for shapes, culture and the vanguard. They transform each piece of furniture into an exclusively "Vondom" mode of expression. Nothing is random, everything happens for a reason. Just as Ramón Esteve become our artistic director for a very good reason.

Ramón Esteve

Creative Director

Posidonia, Hamptons, The
Factory, Tablet, Vineyard

Ramón Esteve Cambra is Architect and Designer; arising one facet as a consequence of the other. In 1991, he founded Ramón Esteve Estudio with the premise that architecture is a global discipline. His training as an architect became a transversal vision where Architecture and Design form one single concept, almost inseparable, both generated under the same laws and the same design premises. Its aim is the development of complete environments through a mutual interaction between both disciplines, so design acts on architecture and vice versa and the importance and difficulty of both disciplines are equally acknowledged.

Jean-Marie Massaud

Milos

Since the beginning of his career (a 1990 graduate of Paris’ ENSCI-Les Ateliers, Paris Design Institute), Jean-Marie Massaud has been working on an extensive range of works, stretching from architecture to objects, from one-off project to serial ones, from macro environment down to micro contexts. Major brands such as Axor, Cassina, Christofle, Poliform, Toyota have solicited his ability to mix comfort and elegance, zeitgeist and heritage, generosity and distinction. Beyond these elegant designs, his quest for lightness – in matters of essence – synthesize three broader stakes: individual and collective fulfillment, economic and industrial efficiency, and environmental concerns. “I’m trying to find an honest, generous path with the idea that, somewhere between the hard economic data, there are users. People.”

Eugeni Quitllet

Tulum

The Catalan designer Eugeni Quitllet was born on 17th April 1972 in Ibiza. He graduated from ‘La Llotja’ art school in Barcelona. Through his creative vocabulary he exceeds simple relationships between function and style unveiling innovative objects. Between drawing, sculpture and contemporary archaeology, Quitllet literally reveals silhouettes hidden in the material, extremely visual skeletal objects elegantly master fullness and emptiness often with a touch of humour: the Masters chair combines the 3 contours of legendary seats by Eames, Saarineen and Jacobsen, the K Ray lamp is an organic UFO, a network of veins hollowed out of the material which results in an object suspended in a frame, his signature method prevalent naturally in several of the designer’s projects: the Shine vases, the Light Air lamp, the O’Clock lamp, without forgetting the O Ring watch, a hole in time in the true sense, best seller of the brand Fossil modernising watchmaking codes. Eugeni Quitllet is a design world freak capable of devouring the whole of our environment in his own way to serve it up to us transformed.

Marcel Wanders

Suave

Born in Boxtel, Wanders graduated cum laude from the Hogeschool voor de Kunsten Institute of the Arts Arnhem in 1988 after being expelled from the Design Academy Eindhoven. In 2000 he opened his studio in Amsterdam, gaining attention in 1996 with his Knotted Chair, which paired high tech materials with ‘low tech’ production methods and in 2001 Wanders co-founded the design label Moooi., of which he is co-owner and art director. Marcel Wanders’ chief concern is bringing the human touch back to design, ushering in what he calls design’s ‘new age,’ in which designer, crafts-person and user are reunited. In his process, Marcel Wanders defies design dogma, preferring instead to focus on holistic solutions rather than the technocratic. In this universe, the coldness of industrialism is replaced instead by the poetry, fantasy and romance of different ages, vividly brought to life in the contemporary moment.
