TAPIS

TAPIS

TAPÍS

TAPÍS

Tapís is a room divider, panel system and an acoustic solution designed by **Isaac Piñeiro**. A micro architecture product that provides a functional, aesthetic and dynamic way to create new spaces without resorting to construction works.

TAPÍS

TAPÍS

With the new normal comes a need to find flexible and dynamic solutions to ensure social distancing and reduce sound. Office dividers are also back in vogue, albeit with a more flexible twist, being installed, moved or rearranged as required while respecting the space's initial interior design concept.

TAPÍS

TAPÍS

Isaac Piñeiro achieves this mobility with a range of hinge-like joints. As well as a straight two panel joint, a T-shaped junction fits three panels, an X-shaped four.

TAPÍS

TAPÍS

The upholstered mobile acoustic walls are available in a wide array of fabrics, including those suitable for severe cleaning conditions.

Tapís takes this one step further. Mix and match fabrics on each face with the seams discreetly running down the sides of the panels (the “symmetric option”) or feature both textiles on the panel’s faces with an off-centre seam (the “asymmetric option”).

Together with our usual range of textiles, you will also find transparent cellular polycarbonate sheeting.

TAPÍS

TAPÍS

The panels are available in three heights and two lengths and are easy to assemble. A light, mobile solution that transforms spaces not only by creating private and intimate corners, but, when using the applicable fabrics, can also become sound absorbing panels, improving acoustics by reducing noise and reverberation.

TAPÍS

TAPÍS

By simply adding new union pieces and orientating the panels, the system lends itself to an almost infinite number of use cases by creating long walls, meeting rooms or social spacers for reception areas. The panels reduce reverberation in environments as diverse as hotels, restaurants, waiting rooms or halls.
