MADE IN ITALY

Antidiva fondata nel 1998 a Seregno nel cuore della Brianza, da Greta ed Alessio Canevese ha rappresentato un punto d'arrivo ed un fattore di ulteriore crescita del percorso imprenditoriale iniziato dalla stessa famiglia Canevese nel 1976. L'acquisto nel 1999, sempre a Seregno, dell' impianto di produzione polifunzionale collegato alla nascita di uno show room ha consentito a Greta ed Alessio ai quali si è unito il fratello Luca di operare lo scatto iniziale per definire l'essenza del marchio. Nel medesimo anno con l'aiuto di aspiranti designers sono stati realizzati i primi prodotti che le hanno permesso di distinguersi all'interno del mercato e di partecipare alle più importanti fiere nazionali ed internazionali. Negli anni 2000 altri talentuosi designers hanno contribuito ad innalzare il livello artistico della collezione. L'impegno da parte di tutti i collaboratori, coordinato dai vertici dell'azienda è stato il principale propulsore che ha consentito la progettazione e la realizzazione di complementi qualitativamente molto elevati. Antidiva oggi è una realtà che si affianca e si ispira alla migliore cultura artigianale del territorio, alla sapiente conoscenza dei materiali definendo così un sistema di offerta consapevole e funzionale per le diverse aree di esposizione e inoltre personalizzato rispetto alle esigenze del cliente. Nel 2012 è stato installato l'impianto fotovoltaico che copre l'intero fabbisogno energetico utilizzato dai comparti produttivi. Passo decisivo nella direzione di una maggiore valorizzazione della responsabilità sociale dell'impresa.

Affidabilità

La rete di collaboratori altamente selezionata produce semilavorati certificati dai più prestigiosi istituti europei (Fira International e Forest Stewardship Council). Ulteriori certificazioni sulle linee prodotte sono state riconosciute anche da importanti soggetti italiani (Ministero dell'interno, Catas e Istituto Giordano).

Antidiva was founded in Seregno, an industrial town in the north of Milan, in 1998 by Greta and Alessio Canevese. It represented the arrival point and a factor of further growth of the business set up by the Canevese Family in 1976. In 1999, still in Seregno, the purchase of a multifunctional production plant linked to the creation of a showroom allowed Greta and Alessio and their brother Luca, who had then joined them in the business, to define the essence of their brand. In the same year and thanks to the collaboration with aspiring designers, the first products were created. They allowed Antidiva to distinguish itself within its market of reference and to take part to the most important national and international exhibitions.

The years 2000 saw other talented designers collaborating and contributing to the artistic enhancement of the collection. All collaborators' efforts, coordinated by the company's owners, were the main engine that allowed the design and the creation of furniture of extremely high quality.

Today Antidiva is a business reality that places itself side by side - and is inspired by - the best artisanal culture of its territory and the deep knowledge of the materials. Antidiva thus defines a system of offers that is conscious and functional for the various areas of its expertise as well as being customised to satisfy all customers' needs.

In 2012 a photovoltaic system was installed on the plant. It now covers the whole energetic needs of all productive departments. This has been an important step towards a greater valorisation of the social responsibility of the company.

Reliability

Our network of highly-selected collaborators creates semifinished products certified by the most prestigious European Institutions (Fira International and Forest Stewardship Council). Further certifications on the product range have been issued also by important Italian Entities (the Home Office, Catas and the Giordano Institute).
