## MATTER COLLECTION

L'immagine ha un valore potente e immediato, mentre la parola è descrittiva e persuasiva, di dettaglio: e la combinazione tra parola e immagine può raccontare storie complesse. Come queste parole, e le immagini che seguono nello sfogliare il catalogo, che ci raccontano in modo assolutamente trasparente: andando oltre all'essenza estetica del prodotto. *Matter* come materia, ma anche come "dare importanza": il titolo richiama la volontà di esplorazione e ricerca, di materiali appunto, ma anche di progetti che sconfinano e interagiscono in ogni ambito dell'arredo, tra il dentro e il fuori. Contesti quasi metafisici fanno da sfondo al prodotto, che entra in risonanza con l'ambiente stesso e trasmette a chi guarda l'intera storia che ha condotto a quell'istantanea. L'oggetto ci racconta il suo vissuto, un progetto di disegno industriale creato secondo i valori dell'artigianato, dove la passione è restituita dalla scelta dei materiali ma anche dalla cura con cui sono lavorati, mentre il variare delle finiture e i colori ci trasmette l'idea di un processo di personalizzazione sempre possibile: legno per tradizione, ma anche il metallo e i tessuti, con capacità di specializzazioni interne all'azienda, sia per i processi di lavorazione dei materiali stessi, ma anche per le fasi di verniciatura e tappezzeria. Il contenuto di questo catalogo è un punto nodale e di analisi di più di cinquant'anni di storia della nostra azienda: che è stata capace di valorizzare e proteggere il proprio passato, ma con un pensiero sempre creativo e sostenibile per guardare al futuro.

The image has a powerful and immediate value, while the word is descriptive and persuasive, of detail: and the combination of word and image can tell complex stories. Like these words, and the images that follow in leafing through the catalogue, which describe us in an absolutely transparent way: going beyond the aesthetic essence of the product. *Matter* as a material, but also as "giving importance": the title recalls the desire for exploration and research, of materials, but also of projects that transcend and interact in every area of furniture, between the inside and the outside. Almost metaphysical contexts are the background to the product, which resonates with the environment itself and transmits to the viewer the entire story that led to that snapshot. The object tells us about its experience, an industrial design project created according to the values of craftsmanship, where passion is returned by the choice of materials but also by the care with which they are worked, while the variation of finishes and colours imparts the idea of a customisation process that is always possible: wood by tradition, but also metal and fabrics, with the ability to specialize within the company, both for the processing of the materials themselves, but also for the painting and upholstery phases. The content of this catalogue is a juncture in time and analysis of more than fifty years of history of our company: which has been able to enhance and protect its past, but with a sentiment that is always creative and sustainable to look to the future.
