# kartell loves the planet

**GREENGUARD**

PRODUCT CERTIFIED FOR  
LOW CHEMICAL EMISSIONS  
[UL.COM/GG](http://UL.COM/GG)  
UL 2818

Our passion for excellence, which has guided Kartell's every move from the onset, has led us to focus on **environmental responsibility** and pay attention to good practices in terms of **sustainability**.

Every day, we are directly and totally committed to laying the paving stones to build our business, making the history of our products, which are devised and designed to offer our customers a piece of great design.

**A Kartell product** is a timeless product, which is produced while **respecting the environment** and which is destined - on completion of its function - to occupy **museum spaces and join collectors' assets**.

Our vocation is to **create value**, and not just objects, but pieces that can contribute towards building a cultural project, not objects that risk being abandoned when no longer used, but instead become memorable pieces.

All the **raw materials** we use are **recyclable** and may be given a new lease on life thanks to material machining processes for industrial-use products.

**Technological research and development**, today just like seventy years ago, enable us to continue to find **materials that can be regenerated** and which have no negative impact on the environment.

Our commitment to implementing and continuing to improve the environmental management system is guaranteed by **compliance with international certification protocols.**

Our **products** are health-friendly, **certified GREENGUARD**, guaranteeing low emission levels and therefore safeguarding the quality of indoor air.

A large number of studies have demonstrated that a high concentration of pollution can be found in closed environments and is released by finishing materials. Every Kartell product has obtained certification to guarantee the low emission of pollutants, classifying them among products that are good for you.

All the **packaging** materials used for Kartell products are **100% recyclable.**

The entire production process supply chain involves our commitment to safeguarding the environment and observing sustainability protocols. Starting with our product packaging, using sustainable practices in every phase of production, and also involving the in-house company management.

**Kartell loves the planet** is the **industrial manifesto** with which Kartell intends to emphasise its commitment **to sustainability and environmental friendliness.**

# CURIOSO?

vieni a vedere cosa c'è di nuovo

# retail

Our **stores** are the most significant representation of **Kartell's industrial strategy**, where we want to create a narrative thread that allows customers to **understand the value and the potential of every object** which encloses within it a special story made up of technology, innovation and creative content, which together create the brand's development prospects.

**The store** is for Kartell an essential **link** in its **supply chain**.

The way each product is presented in the shop window and inside the display space belongs to a design plan,

which is defined the moment its final destination is devised. Kartell today is a lifestyle, made up of a combination of objects from the past which are identified as icons of the brand, along with new, more innovative products which are also structurally and stylistically very different from the creative flair of the past.

They all need to co-exist, and the sales network is the tool to represent this combination, mixing present with future, to be illustrated through the identity of innovation, which remains the common denominator of the brand's commitment.

# new products

**MATRIX** by Tokujin Yoshioka boasts an innovative 3D structure that gives the chair extraordinary refinement and lightness. An innovative chair which combines the creative, experimental ideas of Tokujin Yoshioka and the sophisticated production technology of Kartell. The chair is made using injection moulding, with a metal structure.

The encounter between the worlds of fashion and design has given rise to **CATWALK**, designed by Philippe Starck. The chair embodies an interesting paradox: on the one hand the extreme simplicity of the seat distinguished by clean-cut and strikingly simple silhouettes, and on the other the wealth and sophistication of haute couture, with its elegant clothing. The seat is designed for both indoor and outdoor use.

**VENICE** pays homage to the namesake city. With Venice, Philippe Starck has interpreted the mood of the charming, aristocratic Venetian venues of the city of a thousand souls through a discrete style combined with extreme comfort. Made with a complex injection moulding technique that makes it possible to accommodate the silhouette of the elemental design yet concurrently guarantee stability.

ALTA  
ACQUA  
*Libreria*  
FREE

With the **CARA** armchair, Philippe Starck continues to explore the concept of "less is more". The result of extremely light weight, elegance and immediacy of communication stems from a lengthy process of research into materials and technologies, where the rigour of the classic silhouettes and the comfort of the seat meet and come together. The perfect combination of formalism and technological innovation, for an industrial art-house product that extends Kartell's range of soft furnishings.

**BELLISSIMA** by Ferruccio Laviani conquers with its simple, elegant soft lines. With its simple shape and neutral colour palette, this lamp offers a new interpretation of the Kartell style, able to fit flexibly and stylishly into different spaces.

The **TOY** teddy bear is a new table lamp, designed in collaboration with Moschino and Jeremy Scott. It is a stand-out piece that's ironic, irreverent and colourful. A must for any design addict, and perfect for a child's bedroom, also thanks to the particular versatility and functionality of the plastic material from which it is made.

**SPACE** is a design by Adam Tihany. The lamp recalls the shapes of the Space Needle, the tower that made the Seattle skyline famous. **SPACE** can be recharged using a simple electricity socket, and it can operate autonomously for up to 8 hours, therefore making it ideal for use in the contract world. Simply gently touch the top of the dome to switch on. The chrome-finish version can also be used outdoors.

**MINI KABUKI** is the table version of the lamp by Ferruccio Laviani. The lamp is a perfect synthesis of elegance and injection technology: it is made of a transparent or mass-dyed thermoplastic technopolymer with injection moulding. The unique texture has been designed to propagate light homogeneously.

The **PIAZZA** tray, designed by Fabio Novembre, carries on the designer's architecture-inspired creative path with a scale reproduction of the surface and geometries of the squares of Lecce, the designer's birthplace.

# HOW TO READ THE PRICE LIST

## GENERAL INFORMATION

In 2019, Kartell will celebrate its first 70 years. A story studded with successes and marked by continuous and progressive innovation in production, technology, the evolution of style and the expansion of our product offer. Throughout this long and articulated history, the identity of a brand that is rooted in quality and research into both the product and the industrial process remains constant.

Every day the company works to find solutions that guarantee its customers maximum aesthetic performance on a range of products that use innovative production technologies and materials to optimise industrial processes, limiting costs and ensuring maximum stock availability.

Continuous attention to quality also includes a focus on environmental sustainability both during production and in the management of the product itself.

This publication contains technical information and advice for use that we hope our customers will find helpful.

The Kartell Catalogue is divided into 8 main chapters:

**SEATING**  
**LA DOUBLEJ CAPSULE COLLECTION**  
**SOFAS AND ARMCHAIRS**  
**TABLES**  
**LIGHTS**  
**ACCESSORIES**  
**KIDS**  
**TABLEWARE**  
**FABRICS**  
**BOOKS**

Within each main chapter, the products are grouped by family, where this has not been possible, by type of product. Each product and product declination is immediately recognisable by the accompanying photograph and technical drawings. All products are therefore easy to find without the need for specific knowledge of the Kartell collection.

N.B. The company reserves the right to make changes to the technical characteristics of the products in the catalogue, without notice. Any new product or variation to the technical characteristics of the products will be made known to the public via the most effective methods.

Kartell App

Kartell App is the application for iOS and Android from which it is possible, in countries where the app is available, to access more extensive content and information related to the price list itself, product videos, top editorials and news.

## HOW TO READ AND USE THE PRICE LIST

The pages are organised vertically for each family of products, simply scroll down to read the technical information for each one. Specifically, you will find the following information for each product:

### (A) PRICES

The prices shown in the following price list apply from 1 February 2019 and are valid for 12 months, subject to Kartell's right to revise the same following prior notification. All prices are shown in the reference country currency. For each individual item, the price including VAT will be shown, with the price excluding VAT indicated below. VAT is calculated backed on the law in force in November 2013. Prices are always per unit.

Exceptions to this rule are countries in which dual pricing has not been specifically set out, and therefore only the net price is indicated.

### (B) CODE

This is the number which accompanies each product or individual component, and must be indicated on every order. It is located next to the technical drawing or finish.

### (C) DIMENSIONS

The maximum dimensions are indicated in order to provide all of the necessary elements to assess the space occupied by the product. Depending on the country of reference, the units of measurement are cm or inches.

### (D) WEIGHT

The net weight of the product is stated, as this is a useful piece of information for products such as tables and chairs, to evaluate the suitability of the product for a specific use (e.g. for use in public spaces). Depending on the country of reference, the units of measurement are kg or pounds.

### (E) DESCRIPTION AND MATERIALS

This section contains details of the materials and any essential technical and functional aspects.

### (F) COLOUR SAMPLES

Details of the colours or colour combinations available. The full-colour guide symbol identifies the colours available to be freely combined, the two-way guide symbol identifies the fixed seat/colour pairing that cannot be changed. The colours shown are as close as possible to the actual product shade. However they are to be considered as general indications for consultation.

### (G) SYMBOLS

## SYMBOLS AND SPECIFICATIONS ASSOCIATED WITH INDIVIDUAL LIGHTS

	<b>INSULATION CLASSES</b>	CL.1	CL.1 INDICATES THE LEVEL OF PROTECTION AGAINST ELECTRIC SHOCK. IN THE CASE OF CLASS 1, INSULATION IS "SIMPLE" AND THE APPLIANCE'S EARTHING DEVICES ARE REQUIRED.
	INDICATES THE LEVEL OF PROTECTION AGAINST ELECTRIC SHOCK. IN THE CASE OF CLASS II, INSULATION IS "REINFORCED" AND THE APPLIANCE'S EARTHING DEVICES ARE NOT REQUIRED.		INDICATES A DEVICE IN WHICH THE PROTECTION AGAINST ELECTRIC SHOCK IS BASED ON THE EXTRA LOW VOLTAGE SAFETY POWER SUPPLY AND IN WHICH NO HIGHER VOLTAGES ARE PRODUCED.
	<b>DIRECT MOUNTING</b>		INDICATES THE TYPE OF SURFACE ON WHICH THE APPLIANCE CAN BE MOUNTED. THE SYMBOL "F" INDICATES THAT THE APPLIANCE CAN BE MOUNTED DIRECTLY ON NORMALLY INFLAMMABLE SURFACES.
	<b>PROTECTION RATING</b>	IP20	INDICATES THE DEGREE OF PROTECTION AGAINST THE PENETRATION OF DUST, SOLID BODIES AND MOISTURE. IP20 RATING REFERS TO ORDINARY APPLIANCES THAT HAVE NO SPECIFIC REQUIREMENTS.
	<b>VOLTAGE</b> INDICATES THE APPLIANCE POWER SUPPLY VOLTAGE.		<b>ATTACHMENT</b> INDICATES THE LAMP HOLDER ATTACHMENT TYPE ON THE APPLIANCE. <b>MAX POWER</b> INDICATES THE MAXIMUM POWER OF THE BULB THAT CAN BE CONNECTED TO THE APPLIANCE WITHOUT COMPROMISING ITS SAFETY.

### (H) CERTIFICATIONS

Reliability test information. More information is available in the "CERTIFICATIONS: Reference legislation" section

### (I) INFORMATION REGARDING PACKAGING UNITS

At the bottom of the page, you will see the following information indicated for each package in the order: the number of pieces, weight, volume and dimensions in cm or inches, depending on the reference country. The pieces within a package cannot be purchased separately.

The main window display is a collaboration between Kartell and Moschino, designed by Jeremy Kost. It features a large heart-shaped graphic in the center with the text 'Kartell x MOSCHINO by JEREMY KOST'. The display is filled with various items, including handbags, teddy bears, and clothing. A large teddy bear in the foreground wears a white t-shirt with the text 'THIS IS NOT A MOSCHINO TOY'. A sign on the right side of the window also features a teddy bear and the text 'THIS IS NOT A MOSCHINO TOY'. The background shows shelves with more handbags and clothing items.

# KARTELL BOOKS

## Kartell - The Culture of Plastics

**"Kartell - The Culture of Plastics"** is the first monograph on the Kartell design brand. Published by Taschen and available in six languages in two volumes (the first includes Italian, Spanish and Portuguese and the second includes English, French and German), the monograph is a chronological excursus through the technological, aesthetic and functional innovations and the activities of the Italian company, world leader in the industrial manufacture of design products made of plastic materials now in its third generation.

Narrating the tale in this coffee table book divided into decades from the '50s through to the new millennium are Silvana Annicchiarico, Gillo Dorfles, Chantal Hamaide, Marie-Laure Jousset, R. Craig Miller, Giovanni Odoni, Franca Sozzani and Deyan Sudjic while journalists Giulia Crivelli and Giovanni Odoni interview the current president, Claudio Luti, who in 1988 took over the management of the company from his father-in-law, Giulio Castelli.

A design industry of global fame synonymous with the concept of "transparency" in 400

pages full of images describes its earliest stages, its evolution, the challenges successfully met, its incessant drive in research and technological innovation, its designers, the prizes won and its worldwide distribution.

But Kartell expresses itself best through its product icons that can be found in homes all over the world. There are historic shots and pictures from the archives, announcements and visuals, with detailed captions on technological innovations revealing the history of a company that has taught us to appreciate the culture of plastics.

### **Kartell - The Culture of Plastics**

Taschen Books, 400 pages  
Size: 250x315 mm

## kARTell - 150 items, 150 artworks

### **kARTell - 150 items, 150 artworks.**

Not only a book photographs taken by the most relevant photographers and contemporary artists world-wide, such as Mario Testino, Peter Lindbergh, Helmut Newton, Steven Meisel, David LaChapelle. With absolute freedom, every artist chose a Kartell

product, within the items from the historical until the current collection, in order to give birth to his personal interpretation. In addition to images, a rich collection of stories written by famous people within different fields (cinema, music, art, show business).

A gift idea for design connoisseurs as well as for fashion, visual arts and photography lovers.

### **kARTell - 150 items, 150 artworks**

Skira, 280 pages

Art direction: Luca Stoppini

Italian book code: 95000/03  
English book code: 95000/04  
Public price: 60,00 €

For commercial conditions please contact your agent.

# USE AND MAINTENANCE

Simple care is needed for the maintenance of Kartell products to retain the original features of the materials.

## PLASTIC MATERIALS

**Cleaning.** Use a soft damp cloth with soap or a liquid detergent, preferably diluted with water. The use of the following substances must absolutely be avoided: acetone, trichloroethylene, ethyl alcohol or detergents containing even small quantities of these substances which cause irreparable damage to the plastic of which the products are made.

We recommend always using a damp cloth to prevent plastic surfaces from becoming charged with static electricity which attracts dust. Also avoid abrasive solvents, cleaning powders and creams, steel wool or rough sponge cloths.

**Use.** Do not drag objects across the plastic surface, even if it has a scratch resistant finish, since sharp objects can damage the plastic just as they would damage wood or metal. Do not place very hot plates or pots directly on the surface, but always use a cloth or trivet.

## WOOD

**Cleaning.** As with plastic surfaces, use a soft damp cloth. Do not use alcohol or other spot-removers. For a deeper cleaning use a little non-abrasive liquid detergent and wipe in the direction of the wood grain. Dry the surface well with a soft cloth. Never use acetone, trichloroethylene or ammonia.

**Use.** Moisture in wood can cause swelling which is normal in a natural material. Our woods hold up well under normal temperature and humidity conditions. Slight color variations from one piece of wood to another are normal and these tend to disappear with time. Wood can change color over time. To delay this, it is best to avoid placing it in direct sunlight.

## METALS

**Cleaning.** Normal dirt on either painted or plain metallic steel or aluminium surfaces must be removed with soap and water (preferably hot) and neutral liquid detergent; dry with a soft cloth or with a chamois cloth. Never use cleaning powders, abrasive or steel wool pads, which can cause scratching, or liquid detergents that contain chlorine or its derivatives such as bleach or muriatic acid.

**Use.** Avoid spilling grapefruit juice, cola, salt and coffee on metal surfaces. These can cause indelible stains. To remove black marks on aluminium chair legs, products especially made for steel finishes or non-abrasive car polishes are recommended.

## COVER

Kartell uses different kinds of covers, for each one you may find the appropriate cleaning and usage instructions within the instruction card enclosed in the packaging.

# MATERIALS USED

## PLASTICS

Primary chemical and physical characteristics of the materials used in manufacturing Kartell products. Plastics are organic materials created by man. Their technological and physical characteristics are determined by polymers, in which one or more types of monomers are joined to form a molecule. Plastics can be divided into two major groups based on their chemical and technological performance: Thermoplastic and thermosetting. In recent years, technological research has made it possible to create increasingly sophisticated materials, whose performance and physical appearance are unlike that of what we generally consider as being "plastic". These types of plastic contain not only polymers, but also additives, fillers and reinforcements which give them better physical, chemical, mechanical or processability properties. These are called composite materials or technopolymers.

## THERMOPLASTICS

Thermoplastics are formed by resins which can be made more elastic through heating or harder through cooling. The temperature values depend on each individual resin. They are composed of numerous interwoven independent molecular chains. When heated, these chains slide, enabling the plastic to flow. When cooled, they become hard again. Many thermoplastics are used in the production of Kartell products, and are almost always mixed with other materials to enhance their performance, thereby becoming thermoplastic technopolymers. The main thermoplastics used are Polyolefins, the best known of which are PE (Polythene or Polyethylene) and PP (Polypropylene), ABS (Acrylonitrile, Butadiene, Styrene), PS (Polystyrene), PMMA (Polymethylmethacrylate), PA (Polyamide) and PC (polycarbonate). Their main characteristics:

### Polyolefins

Polypropylene and polyethylene are thermoplastic polymers belonging to the family of polyolefins: Polyolefins are high molecular weight hydrocarbons. They include low-density (LDPE), linear low-density (LLDPE) and high-density polyethylene (HDPE), polypropylene (PP) and polymethylpentene (PMP or TPX). Polyolefins are break-resistant, non-toxic and non-contaminating materials. These are the only plastics lighter than water. They easily withstand exposure to nearly all chemicals. They are easy to colour and modify to create specific alloys, using minerals like talc, as required for the product.

Polypropylene (PP) is lightweight, translucent and strong. It has excellent mechanical and chemical resistance (it has no known solvent at room temperature). It's weather resistant, so it can be used to create products for outdoor use. Thanks to its features and its warm and soft physical appearance, polypropylene is particularly suitable

for manufacturing chairs. Polyethylene (PE) is a chemically inert plastic. It has no known solvent at room temperature; aggressive solvents will cause softening and swelling, but these effects are usually reversible.

### acrylonitrile-butadiene-styrene (ABS)

ABS polymers are a single technopolymer family. The name comes from the first letter of the three monomers composing them:

- Acrylonitrile (A) provides thermal resistance to aging;
- Butadiene (B) helps maintain properties at low temperatures, technical resistance, and impact resistance;
- Styrene (S) gives shine, solidity and ease of processing.

By varying the proportions of the three components, a wide variety of types of ABS can be created for a wide variety of uses: in the automobile sector, office equipment, electrical and electronic products, appliances, and naturally, furniture. ABS are resistant to high temperatures, chemical compounds and ageing, and are solid and impact resistant. They can be given high, medium and low (matte) gloss surface finishes and are easy to colour. However, some types of ABS are sensitive to certain chemical compounds and solvents. Therefore, the anti-cracking properties need to be assessed for each application. ABS aren't generally weather resistant. If the material is not protected, it may fade and become brittle. They are used for most traditional Kartell articles, such as round and square elements and modular bookshelves.

### Polystyrene (PS)

PS is the result of styrene polymerization. It is a rigid and non-toxic polymer with excellent dimensional stability and good chemical resistance to water-based solutions but limited resistance to solvents. It is ideal for products such as waste baskets and office articles. It is used in its so-called "aesthetic" version for its good surface appearance. It is also used as HIPS (scratch-resistant polystyrene), with added rubber to make it scratch resistant.

### Polymethylmethacrylate (PMMA)

Polymethylmethacrylate has high aesthetic and functional qualities. It is transparent, solid and weather resistant. Acrylic resins are used to make all transparent products, including in the furniture sector. So-called "plastic rubbers" can be added to improve their resistance properties, making it impact resistant. Antonio Citterio's Mobil drawers are made of this special combination.

### Polyamide Nylon Resins (PA6)

This is a group of linear polymers with repeated amide linkages along the backbone. These are produced through the polymerization of amino acids. Nylon is strong and tough, abrasion, impact and wear resistant. Numerous fillers can be added to improve its features. It is used for clothes stand bases or Oxo trolley supporting frames, parts which support weights

### Polycarbonates (PC)

Polycarbonate refers to a thermoplastic polymer. When producing objects using this material, the polycarbonate is melted and injected under high pressure into a mould, to give it the desired shape.

There are two principal processes for producing articles with polycarbonate:

- Extrusion: here, the polymer is heated, then injected into a die with the shape of the final

product. This process is used to manufacture pipes, sheets and profiles

- Injection moulding: here, the polymer in granular form is heated, injected into a mould, then cooled, giving it the shape of the final product. This is the most commonly used process for objects in a variety of sectors.

### The advantages of polycarbonate

Polycarbonate:

- has excellent mechanical, thermal and electrical properties
- has high resistance to fire and impacts, and high elasticity
- is easy to recycle and process

These characteristics make this material ideal for a variety of applications: from automobiles to packaging to appliances to consumer products. Kartell was a pioneer in the sector, demonstrating polycarbonate's many applications in the furniture sector as well.

### Polyvinyl Chloride (PVC)

PVC's structure is similar to polyethylene, but contains atoms of chlorine. The chlorine atom makes PVC vulnerable to some solvents but also more resistant in many applications (PVC has a considerable resistance to oils and a very low permeability to gases). Polyvinyl chloride is transparent with a slightly bluish tint, and can be coloured in a vast range of tones.

### Styrene Acrylonitrile (SAN)

Styrene Acrylonitrile belongs to the family of styrenes, and is one of the best in terms of mechanical characteristics. SAN is rigid and hard, either transparent or opaque. Pieces made using SAN have a high dimensional stability and can be "easily" injection moulded.

## THERMOSETTING PLASTICS

These resins can no longer return to their original state after they have been polymerized through heating or other means. Before transformation, thermosetting plastics also have a chain structure. During polymerisation, atomic cross links are created between molecules, forming a complex interlinked network. These atomic cross links prevent the plastic from sliding during subsequent heating processes. Excessive heat damages polymers. The thermosetting resins used in Kartell articles are: PUR (polyurethane), SMC (Sheet Moulding Compound), BMC (Bulk Moulding Compound) and melamine.

### Polyurethane (PUR)

Polyurethanes are formed by two components, polyol and isocyanate, which when combined in different types and percentages form countless materials with differing and contrasting characteristics: from soft polyurethane used by the foam industry to the rigid structural variety, used to make the Battista trolley tops by Antonio Citterio.

### Melamine

Melamine resins—commonly called melamine—are thermosetting resins that are colourless and odourless, resistant to water, chemical agents, abrasion and heat, and are extremely transparent to light.

Melamine resins are used primarily for tableware (especially dishes), plastic laminates and kitchen accessories.

Melamine resin utensils and bowls are microwave safe, absorbing radiation and heat.

### SMC AND BMC

These are thermosetting resins that are mixed

with thermoplastic resins and impregnated with fibreglass. The difference between the two resins comes from the method by which they are impregnated: in SMC the resin impregnates a sheet of fibreglass, while in BMC the moulding mass is impregnated with glass fibres. Fibreglass fill is used to create an especially resistant material, used in Philippe Starck's Miss Balù table tops.

### **Fibreglass Reinforced Polyester (GRP)**

GRP belongs to the family of thermosetting resins; it has high mechanical characteristics, so much so that it is also used in the automobile and electronics industries. Over time, two technologies have been developed allowing economical use of this material in mass-produced products: SMC (sheet moulding compound), where the resin impregnates a sheet of fibreglass and BMC (bulk moulding compound) where the resin impregnates disordered glass fibres. Thanks to these technologies and the material's high mechanical characteristics (up to ten times greater than thermoplastics), highly technological products can be produced that are capable of replacing sheets and die-casting in many cases.

### **WOOD**

Natural wood is taken from the plant, either deciduous or evergreen, and is classified commercially as hardwood or softwood. Kartell uses some of the best wood available on the market. It is processed to guarantee long wear and resistance in addition to respect of all environmental standards. Since wood is a natural material, there can be colour variations from piece to piece. The plastic laminate that is sometimes combined with wood is created through lamination and is composed of phenolic and melamine plastic resins and thermosetting polymers. It is used in the furniture manufacturing sector as a coating for chipboard, MDF, honeycomb and other wooden panels.

### **METALS AND PAINTS**

In Kartell products, metals are limited mainly to structural parts or to emphasize particular aesthetic details. The technologies used are extrusion and die-casting. Often, to improve the surface and aesthetic quality, metal parts are painted: in this case using powder coatings are used, which can be electrically charged to adhere perfectly to the metal surface. The paints used for metal are usually epoxy polyesters. Thanks to their greater durability and resistance to light, abrasion and weather, the products made using these materials can be used outdoors. Die casting is used primarily to solve certain complex aesthetic issues, such as for the legs of the Battista and Gastone carts designed by Antonio Citterio. The die-cast parts can be used as is or coated with epoxy-polyester.

On many plastic products or parts of products, more traditional paints, such as acrylic or polyurethanes are used. In this case painting serves to enhance the aesthetic quality of the surface finish and improve durability.

# CERTIFICATIONS REFERENCE STANDARDS

## UNI LIST TECHNICAL REFERENCE STANDARDS

**Food contact standards**  
Each page of the price list is dedicated to a product that has been tested in accordance with current regulations which are summarised in a table where the left hand column shows the code and/or paragraph of the test to which the product was subjected and the right hand column shows the test results and the levels attained. The specification of each regulation is show below:

### UNI tests for chairs:

**Uni Norm N° 8582/84– 1022/98**  
fatigue test for chair frame  
**Uni Norm N° 8584/84**  
fatigue test for chair frame  
**Uni Norm N° 8585/84**  
impact test for seats  
**Uni Norm N° 8586/84**  
resistance test for repetitive impacts  
**Uni Norm N° 8587/84**  
fatigue test for chair back  
**Uni Norm N° 8589/84**  
test for arm resistance to vertical force  
**Uni Norm N° 8590/84**  
resistance test for horizontal force on arms  
**Uni Norm N° 9083/87**  
resistance test to dropping  
**Uni Norm N° 9088/87**  
side stress resistance test for chair and stool legs  
**Uni Norm N° 9089/87**  
test for back and arm resistance to scratching  
**Uni Norm N° 8591/84**  
duration of the rotation of the seat  
**Standard UNI EN 10977:2002**  
Furniture for the home and collectivity - Seating

### Uni tests for tables:

**Uni Norm N° 8592/84**  
test for stability  
**Uni Norm N° 8593/84**  
test for resistance of tops to concentrated loads  
**Uni Norm N° 8594/84**  
flexibility test of surfaces  
**Uni Norm N° 8595/84**  
structural resistance test  
**Uni Norm N° 9085/87**  
drop test  
**Uni Norm N° 9086/87**  
impact test on legs  
**Standard UNI EN 1729–2:2006**  
Furniture - Chairs and tables for schools  
Part 2: Safety requirements and testing methods  
**Standard UNI ENV 12521:2001**  
Home furniture - tables - Mechanical and structural safety requirements  
**UNI EN 527–1:2011**  
Office furniture - Work tables and desks  
Part 1: Sizes UNI EN 1022:2005  
Home furniture - Seating - Determination of stability

### UNI EN 15372:2008

Furniture - Resistance, durability and safety Requirements for tables not intended for home use

### UNI EN 12521:2009

Furniture - Resistance, durability and safety Requirements for tables intended for home use

### UNI tests for furniture, containers and bookshelves:

#### Uni Norm N° 8596/84

test for stability

#### Uni Norm N° 8600/84

bending test with concentrated load

#### Uni Norm N° 8601/84

bending test for tops

#### Uni Norm N° 8606/84

test for maximum total load

### List of the UNI EN tests for steps:

#### UNI–EN Norm 131–1/94

functional dimensions of the steps

#### UNI–EN Norm 131–2/93

flexibility of the feet and of the platform

Standard EN 1728:2000 took effect in 2002 (UNI EN 1728:2002 in Italy) harmonizing at the European level testing methods for resistance and durability of all the types of domestic seating. This regulation, which replaces previous ones, prescribes much more severe testing procedures than in the past.

Standard EN 15373 came into force in late 2007, updating the testing criteria, cycles and levels, with respect to EN 1728:2000.

Standard EN 16139:2013 came into force at the end of 2012, updating standard EN 15373 (see summary table).

In 2013, standard EN 1728 was updated to the EN 1728:2012+AC:2013 edition (in Italy UNI EN 1728:2012+AC:2013). Standard EN 1730:2000 updated with EN 15372:2008 (for Italy UNI EN 1730:2002) came into force in 2000 for the assessment of table performance took effect in 2000 to determine table performance. This standard stipulates the testing methods to determine the resistance, durability and stability of all types of tables. Tests are conducted on an assembled and ready-to-use table. The references to the characteristics tested are expressed with respect to the paragraph in the standard, as follows:

### STANDARD UNI EN 15373:2000

#### paragraphs 5.1 – 5.2

General safety requirements

### STANDARD UNI EN 1022/2005

Stability

### STANDARD UNI EN 1728/2000

#### paragraph 6.2.1

static load on the back of the seat

#### paragraph 6.2.2

static load on the front edge of the seat

#### paragraph 6.5

static horizontal load on the arms

#### paragraph 6.6

static vertical load on the arms

#### paragraph 6.7

fatigue strength of the seat/back

#### paragraph 6.8

ear and tear on the front part of the seat

#### paragraph 6.10

fatigue strength of the arms

#### paragraph 6.12

static load on front legs

#### paragraph 6.13

static load on side legs

#### paragraph 6.15

resistance of the seat to blows

### paragraph 6.16

resistance of the back to blows

### paragraph 6.17

resistance of the arms to blows

# LIGHTING REGULATIONS CERTIFICATIONS

## REFERENCE MARKS

**CE** – indicates the conformity of the products bearing the acronym with the essential requisites of European Community directives.

**ENEC** – the European trademark for high quality in electrical products which indicates conformity with current European regulations is recognised as the equivalent of the individual national trademarks in 20 European countries, signatories to the Lum Agreement.

**cUL/CSA** – American and Canadian trademark of quality for electrical products. It certifies product conformity with current American and Canadian regulations.

**PSE** – Japanese trademark of quality for electrical products. It certifies product conformity with current Japanese regulations.

**NOM** - Mexican trademark of quality for electrical products. It certifies product conformity with current Mexican regulations.

**EK/KC** - Korean trademark of quality for electrical products. It certifies product conformity with current Korean regulations..

## CB Certificate (Australia and New Zealand)

Certification attesting product conformity with international IEC regulations, can be issued with specific national deviations.

**CB Certificate** – Certification attesting product conformity with international IEC regulations.

**CCC** - China Compulsory Certificate The brand certifies product compliance with Chinese standards and is mandatory for lighting products imported in China.

**SASO** - Certification, certifying SGS compliance with Saso standards, required to import lighting products for the Kingdom of Saudi Arabia and guaranteeing their compliance with applicable standards and technical regulations

## ECO-CONTRIBUTION

Introduced in Legislative Decree no. 151 dated 25 July 2005 (updating directives 2002/95/EC, 2002/96/EC and 2003/108/EC), the eco-contribution is an environmental charge used to pay for waste management of electrical and electronic equipment (WEEE). This charge is used to finance all phases of treatment, transport, recovery and disposal of electrical and

electronic appliances. Kartell lighting prices include the WEEE.

## NOTICE PURSUANT TO ARTICLE 13 OF LEGISLATIVE DECREE NO. 151 DATED 25 JULY 2005.

Directive 2012/19/UE (waste electrical and electronic equipment: WEEE):

User information: pursuant to article 13 of Legislative Decree no. 151 dated 25 July 2005, no. 151 "Updating of Directives 2002/95/EC, 2002/96/EC and 2003/108/EC, regarding the reduction in the use of dangerous substances in electrical and electronic equipment, and the disposal of waste" this product is conform.

The barred bin symbol on the equipment or their packaging indicates that at the end of its useful life, the product must be disposed of separately from other waste. The user must take the equipment to an authorised recycling centre for electronic and electric waste, or return it to the original vendor when purchasing an equivalent product, on a one-to-one basis. The appropriate collection for environmentally-compatible recycling, treatment and disposal contributes to avoiding possible negative effects on the environment and its health and encourages the reuse and/or recycling of the materials used in the equipment. Improper disposal of the product by the user will result in the application of the administrative sanctions stipulated by regulations in force.

# CERTIFICATIONS ISO 9001:2015

ation Network), a supranational body which guarantees mutual recognition of the ISO standard in countries worldwide.

The attainment and maintenance of this certification, made possible by the commitment and perseverance of all company offices involved, testifies to the continued research into ever higher levels of quality in company management systems.

A copy of the Quality Certification is available for downloading on [www.kartell.com](http://www.kartell.com)

## COMPANY QUALITY CERTIFICATION: ISO 9001

In 1996, Kartell decided to certify its Corporate Quality Management System in compliance with UNI EN ISO 9001:1994 standards.

In 2005, the company aligned its Quality Management Systems with the standard UNI EN ISO 9001: 2000.

In 2008, the company renewed its ISO 9001:2000 certification.

And, in 2010, it switched to UNI EN ISO 9001:2008.

During 2017 Kartell updated its certification standard to UNI EN 9001:2015.

A guarantor for this certification process is the I.I.P. (Italian Institute of Plastics), which is itself accredited by SINCERT and CISQ, the Italian federation of accreditation bodies for Quality Management Systems.

CISQ is part of IQNET (International Certifi-

# ISO 14001:2015 CERTIFICATIONS

## RECYCLABILITY

Recyclability, sustainability, eco-compatibility - in a nutshell, respect for the environment - these are the themes which the world community takes very much to heart.

It may seem absurd to talk about environment in terms of productions having plastic materials as their common denominator. Nevertheless, contrary to common belief, Kartell products are perfectly recyclable. To simplify the recycling process, in fact, the various components of Kartell products can be easily separated out and traced back to their single material elements. The plastic parts of each product also bear clear identification markings in accordance with the DIN 6120 specification, part 2, just so that they can be correctly identified and to facilitate recycling.

## PACKAGING

All product packaging (paper, cardboard and plastic wrap) is 100% recyclable according to local recycling practices.

Contributing to environmental sustainability means avoiding waste and improper waste disposal.

For more information on the recyclability of each product, please visit [www.kartell.com](http://www.kartell.com)

## DIN 6120 PART 2 RECYCLING SYMBOLS

The code within the logo identifies the compound in accordance with the following table:

01	02	03	04	05	06	07
PET	PE-HD	PVC	PE-LD	PP	PS	O

## GREENGUARD

In its continuing commitment to protecting its customers' health, Kartell obtained Greenguard certification for its products in 2014.

When purchasing a Greenguard-certified product, consumers can be certain the product has been inspected, does not pollute and is not dangerous.

Greenguard is used by many certification processes for environmentally-sustainable buildings (LEED; CHPS; ASHRAE; Green Globes; NAHB; IgCC, CONSIP) around the world.

## GREENGUARD: CERTIFIED CATEGORIES

Plastic chairs, lamps and Multiplo outdoor tables

## ISO 14001 CERTIFICATION: 2004

In 2011 Kartell achieved UNI EN ISO 14001:2004 certification for its support of an effective Environmental Management System, an international standard recognised throughout the world and developed about 10 years ago which defines development and implementation parameters in corporate processes in order to achieve an effective environmental management system.

## WHAT IS ISO 14001?

This certification attests that the organization certified has implemented a management system capable of controlling environmental impact in its own business and systematically endeavours to improve it in a sustainable, effective and consistent manner. ISO 14001 certification is not obligatory but is the result of the voluntary choice of the Company which decides to define, implement, maintain and improve its own environmental management system.

During 2017 Kartell updated its certification standard to UNI EN ISO 14001:2015.

A copy of the Quality Certification is available for downloading on [www.kartell.com](http://www.kartell.com)

# GENERAL TERMS AND CONDITIONS OF SALE

## I. SCOPE

1. These General Terms and Conditions govern sales contracts entered into by Kartell S.p.A. ("Kartell") and its clients, professionals that purchase and resell ("Client") the Goods presented in the Kartell catalogue ("Goods"). The General Terms and Conditions of Sale may be waived or modified only through a written agreement between Kartell and the Client.

## II. ORDERS

1. Each Product order constitutes an irrevocable offer by the Client. Kartell reserves the right at its sole discretion, to accept, modify or refuse orders at its sole discretion, or to suspend delivery should the Client not provide Kartell with guarantees for the request and not respect the sales guidelines issued by Kartell from time to time.
2. Excluding purchases made for specific purposes agreed in advance with Kartell or in the "contract" channel, the Goods may only be resold retail at the sales point indicated to Kartell.

## III. PRICE

1. Unless otherwise agreed, the prices of the Goods indicated in the price list are ex works for deliveries within the European Union, and ex Kartell warehouse for deliveries outside the European Union.
2. The minimum amount of each order for delivery inside Italy is €400.00 (four hundred euros) excluding VAT, and €500.00 (five hundred euros) excluding VAT within the European Union. Should the order not reach this amount, the order may be accepted with a minimum additional charge on the Client invoice of €25.00 (twenty-five euros) in the first case, and €40.00 (forty euros) in the second case as a "partial contribution to expenses".
3. The price applied to the Goods is that in force at the order date. VAT must be added to the prices indicated in the price list (minus any discounts) in accordance with the law.

## IV. OWNERSHIP

1. Pursuant to Articles 1523-1526 of the Italian Civil Code, ownership of the Goods will be transferred to the Client only upon full payment of the price. In the event of hire purchase and Client default, Kartell shall retain any instalments already paid by way of compensation, without prejudice to claims for greater damages.

## V. PAYMENTS

1. Payment is considered to have been made only when Kartell is in possession of the amount. In the event of payment by cheque or other method, the payment method must

be considered to be accepted subject to payment in due course.

2. However, order payment may not be suspended or delayed due to Client claims or defences regardless of ownership, nor may the Client offset debits and credits with Kartell.
3. In accordance with Article 1186 of the Italian Civil Code, failure to pay or partial payment of any amount owed to Kartell shall automatically place the Client in default with the resulting expiry of the time limit and Kartell's simultaneous right to suspend deliveries, refuse or cancel orders, modify sales conditions and take action to ensure full payment of the credit, in addition to expenses, interests and damages. Late payment will also result in the automatic application (with no prior notice) of late interest at the rate established by Article 5 of Legislative Decree 231/2002.

## VI. DELIVERY

1. The delivery date is purely approximate and non-binding, with Kartell being entitled to make partial deliveries.
2. Should delivery be delayed as requested by the Client, Kartell reserves the right to charge monthly warehousing and/or handling expenses equal to 10% (ten percent) of the amount indicated on the invoice, beginning in the month following notice to the Client of the Goods' availability.
3. Any Product order cancellation or rejection at receipt will result in the application of a penalty on the Client of 30% (thirty percent) of the amount indicated on the invoice, without prejudice to claims for greater damages.
4. Should the Goods be shipped outside EU territory, the Client must provide Kartell all documents certifying Product delivery within one (1) month. Should the Client fail to do so, Kartell reserves the right to charge the Client all expenses incurred to complete the sale operation.
5. At delivery, the Client must carefully inspect the quantity and condition of Product packaging. On pain of forfeiture, any obvious defect must be: (i) reported in writing to the shipper at the time of delivery, indicating expressly on the consignment note "conditional acceptance", and (ii) promptly reported in writing to Kartell within 48 (forty-eight) hours of delivery, in compliance with the instructions below.
6. Any returns must be approved in writing in advance by Kartell: unauthorised returns will be returned to the sender along with delivery charges.

## VII. GUARANTEE AND CLAIMS

1. The legal guarantee for the Goods begins, as per Article 1495 of the Italian Civil Code, on the date of acceptance of Product delivery by the Client or its representatives.
2. Any claim regarding the Goods (excluding those identified at the time of receipt and regarding shipping) must be made in writing to Kartell within 8 (eight) days of the discovery, and in any case within 12 (twelve) months of Product delivery acceptance by the Client or its representatives in compliance with the following procedure: (Par. 6. Claims)
3. With reference to the Consumer Code, Legislative Decree 206 of 6 September 2005, Articles 131 and 132, the Client loses and forfeits any right of recourse against Kartell if it does not notify Kartell in writing of an

end-customer claim within 8 (eight) days of receipt of the end customer's complaint using the procedure described above.

4. Kartell shall not be liable for damages caused by improper use, tampering, normal wear or failure to respect the assembly and maintenance instructions included in the product card, or component modifications or replacements with others not in accordance with the original specifications.
5. In any case, Kartell's liability is limited to the value of the defective goods: Therefore, Kartell may not be held liable, among other things, for expenses sustained by the Client or end customer or for any other damage claimed (direct or indirect).
6. The bulbs contained in the packaging of each lamp are supplied by Kartell as a courtesy in order to provide the best service to our customers. However, since these accessories are not directly manufactured by Kartell but supplied by external suppliers, Kartell does not guarantee their correct function. In case of bulb fault or failure, it is the customer's responsibility to replace the bulb, in compliance with the technical information in the catalogue, in the dedicated section, or in the instruction booklet enclosed with the product, to which reference is made in full, and for which Kartell assumes no liability.

## VIII. COMPETENT COURT

1. Any disputes arising directly or indirectly from the contractual relationship are the exclusive competence of the Milan court.
2. Applicable law is substantially Italian (excluding any application of foreign laws).

# CLAIMS

## CLAIMS FOR SHIPPING DAMAGE

Should one of the following situations be noted at the time of Product delivery

- a) merchandise missing with respect to accompanying document
- b) merchandise different with respect to accompanying document
- c) Damaged packaging, highlighted by the relevant impact indicator where it is affixed to the packaging;

### the Client must

1. write reservations on the consignment note (either on the carrier's copy or on the recipient's copy). Written reservations must be detailed, as general reservations are not sufficient to allow proper processing of the claim
2. Complete the reporting form ( Transport claim form ) in full: the form (facsimile shown below) is available from Kartell's regional agent, or Kartell's Sales Office at **transport@kartell.it**;
3. Send a copy of the consignment note and the reporting form within 48 (forty-eight) hours of Product receipt.

## CLAIMS FOR PRODUCT NON-COMFORMITY

To notify Kartell of a claim in the event of Product non-compliance, send the following documents to the Kartell Customer Care Office at **quality@kartell.it**:

1. The product non-compliance form ( Generic claim form ) completed in full. the form (facsimile shown below) is available from the Kartell Customer Care Office, at the e-mail address above, or from Kartell's regional agent;
2. Photographs showing the non-compliance (at least one photo per non-compliant Product)

If the complaint concerns a new product - just received by the customer or just delivered by the customer to the end customer - you must also send images of the relative packaging (full view and close up of the double label (production and shipping), as shown below.

You should keep hold of the Quality Control slip found inside the Product information, because it contains information which may be required by the Kartell Customer Care Department to make any required checks on production batches potentially affected by non-conformity. **Please also retain the original product packaging.**

Only reports sent to the aforementioned addresses along with all the required elements will be taken into consideration by Kartell.

In the absence of any or all of the required documentation and/or the original packaging, or in the case of failure to follow the procedure set out above, Kartell will be unable to follow up your report.
