

## SPECIFICATION

Range: **CLASP**

Design: **(a+b) Annalisa Dominoni, Benedetto Quaquaro**

“Snowsound Fiber Technology” sound-absorbing element fixed to the wall.

Fabric description:

Sound absorbing “Snowsound Fiber 3 Melange” fabric made entirely of polyester, with 20x40 mm oval metal eyelets on the top for attachment to the structure.

The fabric has a **Class1** fire reaction (Italian standard) and **Euroclass B-s1, d0**.

The fabric is **Greenguard Gold certified**, which certifies its low VOC emission and its contribution to the quality of the indoor environment.

The fabric is **100% recyclable** and has no detectable formaldehyde content according to UNI EN 717-2. It doesn't contain felt or other organic materials (hard to recycle).

Fabric dimension: 138x200 cm = 2,8 m<sup>2</sup>

Frame and fixing kit description:

The frame is made up of tubes, made of ø 15 mm chromed steel rods, connected between them by joints in chromed steel that allow angular or in-line joining. To these joints are added respectively: threaded cylindrical elements ø 10 mm which allow the precise height adjustment of the cables by means of a pressure system with security lock; steel cables ø 1.5 mm and circular plates in chromed steel ø 40 mm equipped with two holes for fixing screws to the ceiling.

Dimension:

End joint

Central joint

Corner joint

Available colors:
