## PRODUCT INFORMATION

"When we work on projects aimed at the environment between office and residential space, we always raise our gaze to look at the surroundings. We don't want to see only the product. We want to see and feel how this product will actually work in a space so it can be of full service to the people who will use it.

We wanted to design Meet so that its functions feature Offecct's main areas, the sustainability aspect and the sound absorbing qualities of their products, the importance to inject life through plants in indoor environments and Offecct's craftsmanship in working with wood and fabrics", says Robin Rizzini.
