

## Officina design Ronan & Erwan Bouroullec

The Officina collection explores a new creative language through the ancient fabrication process that is iron forging. Throughout history, this technique has been used to create an infinite number of everyday objects and decorative artefacts.

This year we see a new chapter in this captivating story, with the presentation of a low table and a bench, which will be available with in different dimensions and materials. These products feature all the distinctive wrought iron structure, once again bringing the allure of a raw material handed down through the centuries: alive, with those slight imperfections that make each item in this collection unique, with a profoundly refined and elegant spirit.
