

Carousel / Rectangular low table Design / Sebastian Herkner

Carousel collection is made up of: four versions of dining armchair, three versions of lounge armchair, sofas, poufs, square and rectangular coffee tables. The easel frame is made of aluminum tubular. The seat, made by a sheet of aluminium alloy which is drawn to have an even shape, and then is following fixed to the aluminium frame through a structural welding, performed with TIG technology that gives particular resistance as well as a better standard in terms of aesthetics. The structure of the steel backrest supports the decorative patterns proposed in the various materials. All selected materials guarantee long-lasting resistance and color stability. About the dining armchair, a version in technical fabric such as Fiber Fill fiber for seat cushion and self supporting back is work in progress. This fabric guarantees water repellency. Because the above mentioned materials, the product is strongly suitable for all uses in marine environments and in extreme weather conditions. The poufs have an oval aluminum tubular structure while the tables have a steel rod structure with an aluminum alloy top, adjustable insoles in nylon and stainless steel screw. They are all decorated with rope weaving.

Description

Code: **1224**

Typology: **Coffee Tables**

Collection: **Carousel**

Static Load: 100 Kg

Shape: Rectangular

Technical Info

Width: **110 cm**

Depth: **80 cm**

Height: **30 cm**

Weight: **14.6 Kg**

Static Load: **100 Kg**

Packaging

Packages: **1**

Pieces for pack: **1**

Dimensions: **116x85x34 cm**

Volume: **0.335 mc**

Polyethylene bag and cardboard box

Materials

Aluminium

Aluminium alloys, particularly suitable for cold-working and for die-casting, appropriately treated to withstand the elements and powder coated.

Maintenance: To keep the product in good condition for a long time, we recommend cleaning it regularly; more often in very damp locations with a marine climate. It is recommended to clean the surfaces using a soft cloth with water or mild detergents. Prolonged and continuous exposure to intense UV radiation or very low temperatures can affect the initial characteristics of the coloured coating, which is made from polyester. We recommend cleaning and storing the products in sheltered places during prolonged periods of non-use and during the winter.

Synthetic Rope

Double braid with polyester or Nylon core and multifilament propylene covering. The external fibre is waterproof and resistant to UV rays.
