1
The Egoa chair is a ingenious design of Josep Mora's and, over the years, the chair has become an icon of Spanish design.

The seat and backrest of the chair are hinged, which allows the chair to adapt to the movements of the user.

The sled frame acts as both a base and a spring, which allows for its characteristic movement.

La silla Egoa es un ingenioso diseño de Josep Mora, que gracias a su movimiento batiente se ha convertido en un clásico del diseño español.

Egoa tiene el asiento y el respaldo articulados, lo que permite que la silla se adapte a la posición de la espalda.

La estructura de patín hace al mismo tiempo de base y de balancín, convirtiéndose en un gran muelle.

2
The seat and the backrest are made of plywood. The front part of the seat is curved downwards for comfort and good circulation.

El asiento y el respaldo son siempre de madera moldeada.

El asiento tiene el borde frontal curvado para facilitar la circulación.

3
The Egoa chair can be finished in natural wood, lacquered wood or upholstered.

El acabado de la silla Egoa puede elegirse en madera natural, madera lacada, o tapizada.

4
The seat and the backrest are connected to the frame by two aluminium parts. This allows the chair to move.

Unas piezas de aluminio inyectado y cromado sujetan la madera, gracias a ellas la silla puede moverse.

5
The Egoa chairs are equipped with four glides, which can be removed for use on a carpeted floor.

La silla siempre se suministra con cuatro tacos de polipropileno. Estos tacos se pueden retirar para los suelos de moqueta.

6
The chair frame is made of 14 mm solid steel rod, specially treated for permanent flexibility. The design of the Egoa chair allows it to be stacked up to 6 units high.

La silla de base de patín es apilable hasta 6 unidades.

7
The Egoa swivel chair is equipped with castors and the height is adjustable.

The castors (Ø65 mm) are made of soft rubber to avoid damaging the floor and they incorporate a brake to prevent accidents when sitting down.

The mobility of the chair makes it ideal for work.

8
STUA provides a system that allows two Egoa chairs to be joined together.

There is a writing tablet for right or left handed persons.

Both the linking system and the tablet can be added to any existing chair.
