

VALISES

design Maarten De Ceulaer
2008

A modular system rich in poetry. Valises combines to form a complete wardrobe system created to safeguard garments, shoes and accessories in style. The various 'suitcase' modules are covered in recycled leather. Valises is a nod to the elegance of by-gone eras with a modern and fun twist. The design evokes the luxurious atmosphere of stylish leather suitcases. The wardrobe is an assemblage of six modules, each specifically designed to accommodate a type of garment. A puzzle that provides a place to store your most beautiful suits or dresses, your most precious shoes, your loveliest hats. The design wanted to design a dynamic and flexible storage system, the opposite of those big and heavy wardrobes, which are difficult to transport.

MATERIALS AND FINISHES

"Full-grain" hide.

* Valises can be customized with different colours of leatherette or fabric.
Valises is transported on pallet.
6 Cartons containing 7 modules.

È possibile personalizzarlo nei colori e nei tessuti.
Viene spedito su pallet 6 colli (7 moduli).
